HARLAN C. KOCH, Assistant Dean, Horace H.
Rackham School of Graduate Studies, Uni-
versity of Michigan, Ann Arbor, Michigan,

Managing Editor: The President, Secretary,
and Treasurer of the Association and the
Secretaries of the three Commissions.

COMMITTEES OF THE EXECUTIVE COMMITTEE

1. *Department of Defense Committee*

LOWELL B. FISHER, University of Illinois, Ur-
bana, Illinois (*Chairman*)

GEORGE A. BECK, Central High School, Duluth,
Minnesota

NORMAN BURNS, University of Chicago, Chi-
cago, Illinois

J. FRED MURPHY, Broad Ripple High School,
Indianapolis, Indiana

2. *Committee on Public Relations*

HARLAN C. KOCH, University of Michigan, Ann
Arbor, Michigan (*Chairman*)

NORMAN BURNS, University of Chicago, Chi-
cago, Illinois

WALTER L. COOPER, J. Sterling Morton High
School and Junior College, Cicero, Illinois

OTIS A. CROSBY, Assistant Director, Department
of Information, Detroit Public Schools, De-
troit 26, Michigan

LOWELL B. FISHER, University of Illinois, Ur-
bana, Illinois

ALVA J. GIBSON, State Department of Educa-
tion, Charleston, West Virginia

R. NELSON SNIDER, South Side High School,
Fort Wayne 6, Indiana

CHARLES W. BOARDMAN, University of Minne-
sota, Minneapolis, Minnesota (*ex officio*)

3. *Advisory Committee on the Program for Annual Meeting in 1957*

PAUL C. REINERT, S. J., President, Saint Louis University, St. Louis 3, Missouri (*Chairman*)
 J. FRED MURPHY, Broad Ripple High School, Indianapolis, Indiana
 C. B. HILBERRY, President, Wayne State University, Detroit 1, Michigan
 NORMAN BURNS, University of Chicago, Chicago, Illinois

CHARLES J. TURCK, President, Macalester College, St. Paul, Minnesota
 FLOYD A. MILLER, State Department of Education, Lincoln, Nebraska
 F. L. BALDWIN, Vice President, University of Wisconsin, Madison, Wisconsin
 CHARLES W. BOARDMAN, University of Minnesota, Minneapolis, Minnesota (*ex officio*)

4. *Committee on Honorary Members*

R. NELSON SNIDER, Principal, South Side High School, Fort Wayne 6, Indiana (*Chairman*)
 GEORGE A. BECK, Central High School, Duluth, Minnesota
 HARLAN C. KOCH, University of Michigan, Ann Arbor, Michigan

JULIAN L. MALINE, S. J., West Baden College of Loyola University, West Baden Springs, Indiana
 J. EDGAR STONECIPHER, Des Moines Public Schools, Des Moines 9, Iowa

REPRESENTATIVES OF THE ASSOCIATION TO VARIOUS ORGANIZATIONS

1. *American Council on Education*

PAUL C. REINERT, S. J., Saint Louis University, St. Louis, Missouri (*President of the Association*)
 CHARLES W. BOARDMAN, University of Minnesota, Minneapolis, Minnesota (*Secretary of the Association*)
 BLAIR STEWART, Oberlin College, Oberlin, Ohio (*Chairman of the Commission on Colleges and Universities*)
 NORMAN BURNS, University of Chicago, Chicago

Illinois (*Secretary of the Commission on Colleges and Universities*)
 L. B. FISHER, University of Illinois, Urbana, Illinois (*Representative of the Commission on Secondary Schools*)
 WALTER L. COOPER, J. Sterling Morton High School and Junior College, Cicero, Illinois (*Representative of Commission on Research and Service*)

2. *National Committee on Cooperative Study of Secondary School Standards*

GEORGE G. BELL, Principal of High School, Huron, South Dakota
 A. J. GIBSON, State Department of Education, Charleston 5, West Virginia
 J. STANDIFER KEAS, State Department of Edu-

cation, Oklahoma City, Oklahoma
 FLOYD A. MILLER, State Department of Education, Lincoln, Nebraska
 NORRIS G. WILTSE, Principal of High School, Ypsilanti, Michigan

3. *Council on Cooperation in Teacher Education*

T. HARRY BROAD, Principal, Daniel Webster High School, Tulsa, Oklahoma

4. *American Association of Colleges for Teacher Education*

T. HARRY BROAD, Principal, Daniel Webster High School, Tulsa, Oklahoma

MEMBERS OF THE THREE COMMISSIONS

A. *Commission on Secondary Schools*

OFFICERS

Chairman: RALPH C. JOHNSON, Principal, Wyandotte High School, Kansas City, Kansas
Secretary: A. J. GIBSON, State Supervisor of Administration, State Department of Education, Charleston 5, West Virginia

STATE REPRESENTATIVES

Arizona
University: R. A. CROWELL, High School Visitor, Tucson (*Chairman*)

C. Subcommittee on In-Service Education of Teachers

PAUL W. HARNLY, Assistant Superintendent in Charge of Secondary Education, Wichita Public Schools, Wichita 2, Kansas (*Chairman*)

FRANK ENDICOTT, Northwestern University, Evanston, Illinois

PAUL R. PIERCE, Department of Education, Purdue University, Lafayette, Indiana.

CHARLES W. SANFORD, University of Illinois, Urbana, Illinois

W. FRED TOTTON, Graduate Training Program,
Mott Foundation Building, Flint 2, Michigan

*d. Subcommittee on Institutions for
Teacher Education*

E. F. POTTHOFF, Director, Bureau of Institutional Research, University of Illinois, Urbana, Illinois (*Chairman*)

GEORGE W. DIEMER, Central Missouri State College, Warrensburg, Missouri

GEORGE E. HILL, Ohio University, Athens, Ohio

*e. Subcommittee on Teacher Education in
Multipurpose Institutions*

MILO BAIL, President, The University of Omaha, Omaha 1, Nebraska (*Chairman*)

THEODORE C. BLEGEN, University of Minnesota, Minneapolis, Minnesota

E. H. CRISWELL, The University of Tulsa, Tulsa, Oklahoma

ELMER ELLIS, University of Missouri, Columbia, Missouri

HENRY G. HARMON, Drake University, Des Moines, Iowa

E. T. MCSWAIN, Northwestern University, Evanston, Illinois

ELI C. FOSTER, Oklahoma A and M College, Stillwater, Oklahoma

f. Subcommittee on Student Teaching

PAUL T. DIXON, Kansas State Teachers College, Pittsburg, Kansas (*Chairman*)

MERLE M. OHLSEN, University of Illinois, Urbana, Illinois

H. W. SCOOOLING, University of Chicago, Chicago, Illinois

MRS. HELEN M. JONES, Oklahoma City Public Schools, Oklahoma City, Oklahoma

THEODORE P. STEPHENS, Aurora College, Aurora, Illinois

BYRON L. WESTFALL, Indiana State Teachers College, Terre Haute, Indiana

MURRAY MARTIN, J. B. Young Junior High School, Des Moines, Iowa

3. Committee on Experimental Units

J. E. STONECIPHER, Director of Secondary Education, Des Moines Public Schools, Des Moines 9, Iowa (*Chairman*)

R. WILL BURNETT, University of Illinois, Champaign, Illinois

A. J. DILLEHAY, Assistant Superintendent of Schools, Akron, Ohio

HAROLD P. FAWCETT, Ohio State University, Columbus, Ohio

WALTER G. GINGERY, Knox College, Galesburg, Illinois

BRUCE GUILD, Superintendent of Schools, Iron Mountain, Michigan

JOHN HAEFNER, State University of Iowa, Iowa City, Iowa

*a. Subcommittee on Publications on
Foreign Affairs*

BRUCE GUILD, Superintendent of Schools, Iron Mountain, Michigan (*Chairman*)

A. J. DILLEHEY, Assistant Superintendent of Schools, Akron, Ohio

JOHN HAEFNER, Professor of Social Studies Education, State University of Iowa, Iowa City, Iowa

*4. Committee on Current Educational
Problems*

J. FRED MURPHY, Principal, Broad Ripple High School, Indianapolis 20, Indiana (*Chairman*)

*a. Subcommittee on Articulation of High
Schools and Colleges*

CLYDE VROMAN, Director of Admissions, University of Michigan, Ann Arbor, Michigan (*Chairman*)

RUSSELL BOLLINGER, Dean of Students, Manchester College, North Manchester, Indiana

PAULINE GALVARRO, Dean of Students, National College of Education, Evanston, Illinois

W. EARL HOLMAN, Principal of High School, Jackson, Michigan

L. D. PIGOTT, Principal of Senior High School, Decatur, Illinois

HELENE WILSON, Dean of Girls, Thornton Township High School, Harvey, Illinois

b. Subcommittee on Reading Improvement

RUSSELL COSPER, Developmental Reading, Purdue University, Lafayette, Indiana (*Chairman*)

EONA DE VERE, Chicago Public Schools, Chicago, Illinois

PAUL L. DRESSEL, Michigan State College, East Lansing, Michigan

GWEN HORSMAN, Detroit Public Schools, Detroit, Michigan

FLORENCE THOMPSON, Indiana State Teachers College, Terre Haute, Indiana

c. Subcommittee on Television

DONALD G. EMERY, Dean, College of Adult Education, The University of Omaha, Omaha, Nebraska (*Chairman*)

LESLIE BROWN, Dean of Administration, Cleveland College of Western Reserve University, Cleveland, Ohio

ROBERT L. FLEMING, Principal, South High School, Youngstown, Ohio

RICHARD B. HULL, Director, Radio-Television Service, Iowa State College, Ames, Iowa

LAWRENCE E. MCKUNE, Television Coordinator-Producer, Michigan State College, East Lansing, Michigan

WANDA MITCHELL, Television Coordinator, Evanston High School, Evanston, Illinois

The Report of the Secretary of the Association¹

Mr. President, Members of the Association: I suspect that there are a great many members of this Association who have no real knowledge about it, its organization and its activities, for we are a very complex agency. Just looking through the programs that you have in your hands will indicate to some extent the divisions, the complexity that there is in this organization.

One of my functions this morning is to attempt to describe briefly the general organization and some of the activities of this Association. May I say something that is probably trite; most of you are familiar with it. We consist, you see, of the General Association, which is meeting now. The General Association is divided into three Commissions, the Commission on Colleges and Universities, the Commission on Secondary Schools, and the Commission on Research and Service. Each of these Commissions is to a large degree autonomous. It carries on its own activities.

The agency which operates the entire Association is the Executive Committee which must approve the actions and activities of the various Commissions.

This morning I want to report to you first on some of the things that the Executive Committee has been carrying on.

Last year I talked briefly about the

publication, *Your Life Plans and the Armed Forces*, upon which a committee of the Executive Committee had been working for about three years. This volume was issued this last fall, in late October. Twenty-five thousand copies were distributed to all of the secondary schools of the United States.

This volume, as its title suggests, is an effort to give people, high school boys and girls, some idea of what it means when they face entrance into the Armed Forces and what the nature of educational opportunities is in the Armed Forces. Contrary to much belief, much common belief, there are many opportunities indeed in the Armed Forces for people to continue their educational activities.

Although it has been selling well, this publication has not had what one might call a dramatic sale so far this year. After October, it was a little difficult for high schools to readjust and reorganize their programs. There is no question but that there will be a much greater demand for it during the coming years.

Commendations of *Your Life Plans and the Armed Forces* have come from all corners of the country. The *Kiplinger Letter* has carried an article about it, and it has been purchased by businessmen in rather large numbers.

One thing that the Executive Committee has never done was to try to bring together all the policies and regulations which it has from time to time adopted. About eighteen months ago a beginning was made on this particu-

¹ Presented at the Annual Business Meeting of the Association in Chicago, April 13, 1956.

lar problem. The minutes of the Association from its beginning were read. All of the data were brought together. One interesting fact was that many policies were reiterated from time to time. All of the actions were restudied and this last fall the final adoption of a statement of policies and regulations governing the activities of the Executive Committee was adopted. That was published in the January QUARTERLY, if any of you are interested in reading it in detail.

Another thing that both the Executive Committee and the Commissions have been very much interested in for approximately twenty years is the development of means for getting greater publicity for our Association and its activities.

As I announced last year, an effort was being made to solve that problem by a little publication which comes out three times a year called *The N.C.A. Today*. This presents a very brief report of what is being done by the various Commissions and the Association in general.

The thing that is interesting is the demand for it. It seems to be growing. We are publishing approximately 15,000 copies at the present time. There are 3,724 member schools. We send it to each member school, of course. The additional copies are requested by the schools themselves for use in their communities and by their boards of education, P.T.A.'s and service clubs, such as Rotary and others in the community. We shall be very glad to supply you with this publication if you wish. There is always a little form in *N.C.A. Today*. When it is filled out and mailed to my office it will bring you any quantity you desire. In one instance we sent 2,000 copies to a single institution on request.

Now, let's begin with the Commis-

sions. The Commission on Colleges and Universities has been reorganizing its structure during the last two years. The task was accomplished at last year's annual meeting. Changes in the constitution were made so that the new organization could go into effect. The Commission is now in the process of putting this organization into action, ironing out the bugs and finding out how well it works.

The new organization provides for a committee in each of the geographical regions of our Association, representative of types of institution, such as junior colleges, colleges offering baccalaureate degrees, and so on. For the first time, this year these committees received applications for membership in the Association from non-member colleges. They went over these very carefully and made their recommendations to the Board of Review, the organization which in the past, customarily carried on the immediate accrediting activities of the Commission. The Board of Review then made its report to the entire Commission for final action.

Through this procedure every effort is being made to get as broad a base for any action of the Commission on membership as possible. There seems to be every evidence that these procedures are operating remarkably better than those that were used in the past, largely because the basis for making decisions has been broadened.

The Commission also has the problem of accrediting professional agencies. Effort has been made to find the means by which the Commission could work with professional agencies of various kinds to bring about cooperation in accrediting. A procedure has been adopted by which persons representing liberal arts rather than professional education are appointed as generalists to evaluate general

education in professional fields. Up to the present time forty generalists have been selected who are working with twenty-five professional institutions to bring about a better basis upon which the accrediting of those institutions may rest.

The Commission also has been greatly interested in trying to find ways and means by which it could accredit graduate work. This is a very difficult problem. The Commission has adopted a statement of principles to serve as a guide. This statement is lengthy. I am not going to report it, but simply say that it is in operation as a basis for programs of schools that are offering Master's degrees.

The Committee on Reorganization of the Commission, which was responsible for the changes in structure that the Commission has made, has turned its attention now to a revision of the criteria for accrediting. It is preparing a manual which it hopes to complete in a year or two and which will develop and interpret the procedures under which accrediting has been conducted.

The Commission on Secondary Schools has quite a number of interesting activities. One of these also is a step toward revision of criteria. The Commission on Secondary Schools is tremendously decentralized. In each state there is a committee to which applications for membership and reports of member schools are first made. The recommendations of these state committees are sent to the Annual Meeting for study by the reviewing Committees, thence to the business meeting of the Commission, and finally, for schools that are accredited, to this general meeting of the Association for action.

Although criteria for secondary schools have been adopted, the interpretation of these criteria has rested to some degree in the hands of the

state chairmen and of the state committees. There are differences in these interpretations; often language is not clear; and the statement of policies is not perfect. Consequently the Commission has appointed a committee to develop a manual which will interpret the meaning of the Policies, Regulations, and Criteria of membership of secondary schools in this Association. This will not be done rapidly. It will probably take about two years to complete this project. A report of progress may be expected next year.

One activity which the Commission on Secondary Schools adopted approximately ten years ago was the accrediting of schools for dependents; that is, for the children of persons in the Armed Forces or of civilians under governmental appointment who are working in foreign countries. These schools have grown very rapidly. As I said last year, they were thought of at first as temporary. There does not seem at the present time any immediate closing of this operation, however.

At the present time there are thirty-four schools in Europe, Africa, the fringes of Asia, Japan, and the Philippines and Puerto Rico, which are accredited by our Association. This is done by agreement with all of the other regional accrediting associations to the end that the Commission on Secondary Schools has this responsibility.

The Commission has struggled to develop an appropriate organization for administering these schools. Elementary schools have grown up around them until today, as nearly as we can estimate, these clusters in foreign lands enroll about 133,000 children. The only agency to which these people can turn for guidance in their educational activities is the North Central Association through its Committee on Dependent Schools. The Commission has sent persons to visit these schools

each year. It has a Director of Dependents' Schools in Europe who has been operating there for the past two years.

I am happy to report this morning that the Armed Forces in general have finally adopted a definite program of organization and administration for these schools, both elementary and secondary, which is similar to that which is used in good American schools. Civilians are in charge.

I might add, for anyone who is qualified and interested, that in these schools there are a number of positions open for principals, supervisors, and teachers. Should any of you be interested in inquiring further, may I refer you to Mr. Alva Gibson, Secretary of the Commission on Secondary Schools. He will be glad to give you the essential information.

May I make a comment about the Activities Committee on the Commission on Secondary Schools. This originated when the problems of athletics were brought up in this Association some years ago. Here I shall state briefly that during the past year this Committee has made a study of the purposes, facilities, types of athletic activities, both extramural and intramural, of all high schools in the Association. Further study of the improvement of athletic activities in our high schools is contemplated. The study will be reported in a forthcoming issue of *THE QUARTERLY*.

Now may I turn to the Commission on Research and Service. This could really be called the Service Commission. That may sound critical of the other Commissions, for they also serve their member schools. But they have the additional problem of membership, of accreditation, which looms so much larger in the minds of many people that the service activities of these Commissions are often overlooked.

For a number of years, the Commission on Research and Service has had subcommittees on Teacher Education, on Liberal Arts, on Teacher Colleges, and on other types of institutions. It has conducted summer workshops for these institutions at several universities. It is now carrying on in-service education programs in member colleges.

New this year is the development of a Committee on Student Teaching to study how persons preparing for teaching can best get practice while in the field. This Committee, appointed just last summer, has made its first report which will probably be printed in *THE QUARTERLY* in the very near future.

Perhaps one of the most interesting committees is the Committee on Articulation of High Schools and Colleges. Any of you who were privileged to attend the meeting conducted by this Committee on Tuesday evening of this week will have a broader view of its field and its activities than I could possibly give you. Its function at the present time is to try to identify problems of articulation of secondary schools and colleges which it may help colleges to solve.

Of course the very great influx of students into the high schools, which also is beginning to be felt in the colleges, makes this problem of articulation more important than it has been in the past.

Another committee, about two years old, is the Committee on Television. Those of you who had the opportunity to attend its program on Wednesday afternoon in the Red Lacquer Room know something about what it is trying to do. It is studying the use of television in education and the ways by which it can best be employed. It is attempting to stimulate the other Regional Associations to unite on a national scale for the study of tele-

vision as an educational medium.

The Committee on Reading is another new committee on the Commission on Research and Service. It made its first report this week, which will also be published in *THE QUARTERLY*. This Committee is attempting to find ways of improving reading. It is not interested in the remedial aspects. It is interested in the ways in which it can help institutions and teachers, secondary and higher, to improve instruction in reading.

Perhaps the most ambitious program of the Commission on Research and Service is that of the Committee on Publications on Foreign Affairs. This Committee has been developed during the year. We are interested in providing children with constructive concepts about foreign relations, and yet foreign relations change so rapidly that textbooks are always out of date. Consequently, an effort will be made to develop bulletins of some size by which materials can be made available about foreign relations problems as they exist at the present time.

To carry on this program, the Ford Foundation has granted to the Association the sum of \$125,000 for a two-year preliminary study. The Commit-

tee has appointed a director and a number of writers and has selected a group of schools for a preliminary experimental project to try out the bulletins which they are writing. Thirty-one schools in six states comprise this group. There are one hundred teachers and 6,000 children involved. I mention these facts so that you may know something about the size of the project. The materials and effectiveness of the program will be determined and evaluated and next year a wider study will be carried on in terms of the findings that have come from this preliminary study.

Ladies and gentlemen, this is a very brief report. I hope that I have not been too dull in the way in which I have presented it to you. I am hopeful that you may now have a little broader concept of the activities of the Association. Again, may I say, it is the breadth of the Association, its complexity, which gives us, all of us, something to learn. If I remember correctly, I have been in this Association since 1920; at least for a long time. I constantly find new things to learn about some Commission or some aspect of the Association which I had not comprehended before.

Proceedings of the Commission on Colleges and Universities

I. REPORT OF THE COMMISSION

AT THE ANNUAL MEETING of April, 1956, the Commission on Colleges and Universities operated for the first time under the plan of organization adopted a year ago. The Annual Meeting opened with meetings of the District Committees of the Commission on Sunday afternoon, April 8. These Committees are composed of the Commissioners from the five geographic areas into which the North Central territory has been divided. At the meetings of the District Committees consideration was given to various proposals, and tentative plans were made for utilizing the de-centralized form of organization for improved services to the colleges and universities in our territory.

Sunday evening, April 8, and Monday morning, April 9, the Commissioners were re-grouped to meet as representatives of different types of institutions: junior college, Bachelor's degree-granting institutions, Master's degree-granting institutions, and Doctor's degree-granting institutions. These Committees, serving as reviewing Committees for the Board of Review, studied the reports of the examiners on institutions coming up for review, and conferred with the chairmen of the examining committees and with the representatives of the institutions under consideration.

The actions recommended by the Committees by Type of Institution were submitted to the Board of Review which met Monday afternoon and

evening, April 9, and Tuesday morning, April 10. The Board of Review, freed of the heavy responsibility for accreditation matters which it has carried in previous years, was able to devote more time to matters of general policy than has been possible in the past.

On Tuesday afternoon, April 10, the Commission met in Executive Session to take action on the recommendations of the Committees by Type of Institutions and the Board of Review relative to accreditation matters. The following actions were taken:¹

The Commission recommended that the following Bachelor's degree-granting institutions be accredited:

Bethany-Nazarene College, Bethany, Oklahoma
Marian College, Indianapolis, Indiana
Olivet Nazarene College, Kankakee, Illinois
West Virginia Institute of Technology, Montgomery, West Virginia

The Commission also recommended that Eastern Michigan College, Ypsilanti, Michigan, be accredited as an institution authorized to confer the Master's degree.

The Commission recommended no change in the accredited status of colleges and universities not mentioned in this report. This includes a number of member institutions whose programs were reviewed this year but whose accredited status was not changed as a result of the review.

¹ These recommendations were subsequently adopted by the Association at its meeting on April 13.

The Commission met in open business meeting on Wednesday morning, April 11, to hear reports from the Committee on Planning, the Committee on Reorganization, the Committee on Professional Education, and the Committee on Graduate Programs in Education. The reports of the Committee on Planning and of the Committee on Reorganization were progress reports, and no action on the part of the Commission was required. The report of the Committee on Professional Education dealt with the controversial issues stemming from the formation and functioning of the National Council for Accreditation of Teacher Education. The recommendations of the Committee for the solution of the problem were adopted by the Commission with minor modifications. Following is the Commission's action:

1. That the National Commission on Accrediting should continue to negotiate with NCATE relative to the structure of that body, and
2. That the end of such negotiations should be the formation of a structure which would require that a majority of the voting members of the NCATE be chosen from colleges and universities with attention being paid to representation from types of institutions in proportion to their contribution to the supply of teachers.
3. That the NCATE indicate its acceptance of the principle that its chief area of concern is the professional portion of the program pursued by prospective teachers and that for approval of the liberal arts and other teaching fields it accept the recommendation of the appropriate regional accrediting agency. It follows, of course, that in its appraisal of programs in the liberal arts and other fields pursued by prospective teachers, the regional accrediting agency should give careful consideration to the needs of prospective teachers.
4. That continuing negotiations be directed toward the end that the major portion of the financial support for the accrediting activities of the NCATE should be secured from institutional sources.
5. That a high degree of cooperation between the NCATE and the regional accrediting associations particularly in the acceptance and application of the principle of chief concern stated in No. 3 be encouraged.

The report of the Committee on Graduate Programs in Education was adopted by the Commission in slightly modified form as a guide in the initiation and conduct of programs for the improvement of classroom teaching leading to the Master's degree. This statement of policy is reproduced below. It will also be made available to member colleges and universities as a supplement to the *Manual of Accrediting*.

The Commission discussed some of the problems of intercollegiate athletics. It was noted that the Commission's policy on athletics calls for cooperation with the athletic conferences and the National Collegiate Athletic Association looking toward the utilization of the resources and machinery of those organizations in the enforcement of appropriate standards for the conduct of inter-collegiate athletics. The Commission took action requesting that the newly formed Committee on Athletics explore ways in which this policy may be implemented and report back to the Commission.

The Commission voted to request the Committee on Reorganization to consider the possible desirability of enlarging the Commission with a view to broadening participation in the activities of the Commission.

II. STATEMENT OF POLICY RELATIVE TO THE ACCREDITING OF INSTITUTIONS OF HIGHER EDUCATION¹

INTRODUCTION

This statement of policy defines certain principles that will be followed in accrediting institutions of higher education. It is stated in general terms and includes brief descriptions of those characteristics of an institution that will be examined as a basis of accreditation.

This statement of policy is supplemented by a manual which contains elaborations of the statements here given and detailed directions for the execution of the policy here set forth. Upon each important issue the *Manual* contains specific directions for the collection of information and such norms and criteria as will make possible a fair and intelligent evaluation of an institution.

MEMBERSHIP

The North Central Association of Colleges and Secondary Schools will accredit and admit to membership as an institution of higher education a university, college, junior college, or institution of similar character that is judged to be of acceptable quality in matters later defined in this statement of principles. In the interpretation of this policy the liberty to integrate the whole or a part of a secondary school with a higher institution will be permitted.

Eligibility for membership will be based upon the character of an institution as a whole, including all the units within its organization. In the case of units, such as professional schools, that fall within the areas of other accrediting

agencies, the actions of such accrediting agencies will be taken into account; but the Association does not bind itself to accept the judgment of these agencies.

PURPOSES OF ACCREDITING

The purposes of the Association in accrediting higher institutions are as follows:

1. To describe the characteristics of institutions worthy of public recognition as institutions of higher education
2. To guide prospective students in the choice of an institution of higher education that will meet their needs
3. To serve individual institutions as a guide in interinstitutional relationships, such as the transfer of students, the conduct of inter-collegiate student activities, the placement of college graduates, and the selection of college faculties
4. To assist secondary schools in the selection of teachers and in advising students as to a choice of institutions, and to promote in any other ways the co-ordination of secondary and higher education
5. To stimulate through its accrediting practices the improvement of higher education in the territory of the North Central Association

BASES OF ACCREDITING

An institution will be judged for accreditation upon the basis of the total pattern it presents as an institution of higher education. While institutions will be judged in terms of each of the characteristics noted in this statement of policy, it is recognized that wide variations will appear in the degree of excellence attained. It is accepted as a principle of procedure that superiority in some characteristic may be regarded as compensating, to some extent, for deficiencies in other respects. The facilities and activities of an institution will be judged in terms of the purposes it seeks to serve.

¹ At the annual meeting of the Association in April, 1934, this statement of accrediting policy was unanimously adopted by the Association in lieu of the accrediting standards in use up to that time.

ELIGIBLE INSTITUTIONS

To be considered by the Association an institution must be incorporated as a nonprofit corporation devoted primarily to educational purposes and¹ legally authorized to confer collegiate degrees, or to offer a definitely described portion of a curriculum leading to such a degree, or to offer curriculums leading to an academic certificate. As a condition of eligibility, an institution must include among its major functions the provision of general education as defined in the *Manual*. An approved institution is not barred from offering curriculums terminating at the end of one, two, or three years if they are taught at the level of collegiate instruction. The curriculum should presuppose the completion of a secondary-school curriculum as a condition for entrance to the institution, or secondary courses should be so integrated with the curriculum of the institution itself as to guarantee the educational progress of students to a definite stage of advancement beyond the completion of the usual secondary-school offering. Before an institution will be considered for accreditation, it must have been in operation long enough to make possible an evaluation of its program.

INDIVIDUALITY OF INSTITUTIONS

In its accrediting procedures the Association intends, within the general patterns of higher education, to observe such principles as will preserve whatever desirable individual qualities member institutions may have. While it is necessary to emphasize certain characteristics that are recognized as basic, such as the competence of the

faculty, the representative character of the curriculum, effective administration, standards of student accomplishment, and financial adequacy, it is regarded as of prime importance also to protect such institutional variations as appear to be educationally sound. Even in these basic matters it is clear that considerable divergence from average or optimum conditions may occur without perceptibly detracting from the essential educational worth of an institution. Uniformity in every detail of institutional policies and practices is believed to be not only unnecessary but undesirable. Well-conceived experiments aimed to improve educational processes are considered essential to the growth of higher institutions and will be encouraged.

PUBLISHED LIST OF ACCREDITED INSTITUTIONS

The Association will publish one list of accredited institutions of higher education. Attached to the name of each institution in the list will be notations relative to such objective facts as are pertinent to a description of the characteristics of an institution.

CONTINUING REVISION OF POLICY AND PROCEDURES

The effect of this program of accrediting upon the welfare of institutions is the vital matter in its formulation and adoption. Continuous study leading to adjustment and improvement is accepted as necessary to the full fruitage of the plan and will be considered an integral part of the regular accrediting activities of the Association. It shall be the policy of the Commission to study the operation of the principles given in this statement of policy and of the detailed procedures described in the *Manual*.

In pursuit of this policy there will be collected periodically from member

¹ The words "incorporated as a nonprofit corporation devoted primarily to educational purposes and" were added to the Statement of Policy at the annual meeting of the Association in April, 1937.

institutions such information as will contribute to the procedures of accrediting and will reveal the changing character of these institutions. It shall be the duty of the Secretary, with the counsel of the Board of Review, to conduct biennially a study in one of the following three areas: (1) faculty competence, (2) library, (3) finance. Others areas may be studied as the Board of Review deems desirable, but furnishing of information for general studies outside the three areas mentioned shall be on a voluntary basis on the part of member institution. The report forms shall be adapted to characteristics of the several types of institutions represented in the Association, and constructed in the simplest form consistent with usefulness.

CRITERIA OF INSTITUTIONAL EXCELLENCE

I. PURPOSES AND CLIENTELE

Recognition will be given to the fact that the purposes of higher education are varied and that a particular institution may devote itself to a limited group of objectives and ignore others, except that no institution will be accredited that does not include among its major functions the provision of general education.

Every institution that applies for accreditation will offer a definition of its purposes that will include the following items:

1. A statement of its objectives in general education
2. A statement of the occupational objectives, if any, for which it offers training
3. A statement of its objectives in individual development of students, including health and physical competence

This statement of purposes must be accompanied by a statement of the institution's clientele showing the geographical area, the governmental unit, or the religious groups from which it

draws students and from which financial support is derived.

The facilities and activities of an institution will be judged in terms of the purposes it seeks to serve.

II. FACULTY

An institution should have a competent faculty, organized for effective service, and working under satisfactory conditions.

In determining the competence of the faculty, consideration will be given to the amount and kind of education that the individual members have received, to their experience in educational work, and to their scholarship as evidenced by scholarly publications and contact with learned societies. Attention will be given to the faculty requirements implied by the purposes of the institution. The educational qualifications of faculties in colleges of similar type will be considered in judging the competence of a faculty.

Under faculty organization consideration will be given to the number of the faculty in ratio to the number of students, to representation of the teaching fields, to the training of instructors in their fields of instruction, to group organization of the faculty, to faculty meetings, and to faculty committees.

Under satisfactory working conditions consideration will be given to the following: salary status; tenure; instructional load; recruiting, selection, and appointment; aids to faculty growth; and provisions for leaves of absence, retirement, insurance, housing, and recreation and community life.

III. CURRICULUM

The curriculum of an institution should contain the subject-matter offerings implied by its statement of objectives. These offerings will include provisions for general education, ad-

vanced courses when the purposes of an institution require such offerings, and special courses appropriate to the specific objectives which the institution claims as among its functions.

An institution should provide appropriate facilities for general education unless, as may be the case in a particular institution, its program presupposes the completion of an adequate program of general education at the collegiate level prior to entrance.

The organization of the curriculum should be such as will best serve students of the type whose admission is implied by the declared purposes of the institution. Responsibility for the grouping of curriculum content, as by courses, departments, or divisions, will lie with institutions. The merit of a curriculum organization will be judged primarily by the manner in which it functions.

The curriculum of an institution will be regarded as effective only when the faculty includes instructors competent by reason of educational preparation to offer instruction in announced courses.

The institution should be able to show clearly that the curriculum as described in published statements is effectively administered in the case of individual students and that there is reasonable adherence to stated requirements in the awarding of degrees and certificates of progress.

IV. INSTRUCTION

An institution will be expected to show a sympathetic concern for the quality of instruction offered students and to give evidence of efforts to make instruction effective. Consideration will be given to the emphasis placed by the institution upon teaching competence in the selection and promotion of teachers, to the manner in which young instructors are inducted into

teaching activities, to the aids that are provided as stimuli to the growth of individual members of the staff, to the institution's concern for high scholarship in students, to its emphasis upon the adjustment of the curriculum and teaching procedures to the abilities and interests of students, to efforts to make such examinations as are given more reliable and more accurate measures of student accomplishment, and to the alertness of the faculty to the instructional needs of students. Familiarity of the administration and faculty with current discussions of instructional problems at the college level and with recent experimental studies of college problems are further evidences of institutional alertness to the need for good college teaching.

V. LIBRARY

The library should provide the reading facilities needed to make the educational program effective, and there should be evidence that such facilities are appropriately used.

In estimating the adequacy of the library, attention will be given to the holdings of standard works of general and special reference, to the holdings of magazines and periodicals, and to the number and variety of books. The use of the library by students and by the faculty, library expenditures over a period of years, the salaries of the library staff, the qualifications of the staff, and the administrative practices relating to the library will all be considered in this connection.

VI. STUDENT PERSONNEL SERVICE

The policy of an institution in admitting students should be determined, on the one hand, by the purposes of the institution and, on the other, by the abilities, interests, and previous preparation of applicants. An institution should admit only those students whose

educational interests are in harmony with the purposes of the institution and whose abilities and previous preparation qualify them to pursue the studies to which they are admitted.

The student personnel service of an institution should assist students to analyze and understand their problems and to adjust themselves to the life and work of the institution.

In evaluating the practices of an institution in the induction of students, attention will be given to the provision for preregistration guidance in cooperation with secondary schools, to the criteria used in the selection of students, to the administration of the stated entrance requirements, and to the arrangements for introducing new students to the life and work of the institution.

Consideration will be given to the means employed by an institution to assist students in the selection of courses and curriculums, in solving immediate academic problems, in furthering their scholastic development, and in making suitable vocational choices and preparation. Attention will also be given to the practices of an institution in counseling students about their health, their financial affairs, and their intimate personal affairs. The student's relation to extra-curriculum activities will also be studied. The practices of an institution in the provision and control of health services, in the housing and boarding of students, in the management of extra-curriculum activities, in the control of student conduct, and in financial assistance to students will be considered.

VII. ADMINISTRATION

The administrative organization should be suitable for accomplishing the objectives of the institution. Adequate provision should be made for

the performance of all administrative functions by a personnel competent in their respective lines of activity.

In evaluating the administration of an institution, the emphasis will be placed upon the manner in which the functions are performed rather than upon the organization or the personnel, although the suitability of the organization and the competence of the personnel cannot be ignored. Attention will be given to such matters as the constitution and activities of the board of control; the general system of administrative control; the administration of academic matters, such as curriculum, faculty personnel, and instruction; the business administration, including financial accounting, budgeting, purchasing, the collection of revenues, and the supervision of the finances of student activities; the administration of the physical plant; the management of invested funds, if any; the administration of the student personnel service; the administration of special educational activities, if any, such as summer session or extension services; and the system of records and reports.

VIII. FINANCE

The institution should provide evidence of financial resources adequate for and effectively applied to the support of its educational program.

The items of information to be considered in determining the adequacy of the financial support are the expenditure per student for educational purposes;¹ the stability of the financing, as indicated by the amount of income per student from stable sources, and the avoidance of burdensome indebtedness; and the procedures in

¹ A phrase relating to the dependence of an institution upon student fees was deleted from the Statement of Policy at the annual meeting of the Association in April, 1937.

financial accounting and reporting. Necessary adjustments will be allowed for contributed services of instructors and administrative officers in Catholic institutions.

IX. PHYSICAL PLANT

The physical plant, comprising grounds, buildings, and equipment, should be adequate for the efficient conduct of the educational program and should contribute effectively to the realization of the accepted objectives of the institution.

In judging the plant, consideration will be given to the adequacy and effectiveness of such features as site; general type of buildings; service systems; classrooms, laboratories, and other facilities appropriate to the special purposes of the institution; office facilities; library building; facilities for health service, recreation, and athletics; dormitories; auditoriums; assembly rooms; and the operation and care of the plant.

X. INSTITUTIONAL STUDY

An institution should continuously study its policies and procedures with a view to their improvement and should provide evidence that such useful studies are regularly made.

Consideration will be given to the means used by the institution in the investigation of its own problems, to the nature of the problems selected for study, to the staff making studies, to the methods employed, to the attitude of the administration toward and the support given to such studies, and to the manner in which the results are made available to the faculty, the administrative staff, and the interested clientele. It is recognized that such studies may be of many sorts, ranging from small inquiries of immediate service value to elaborately conducted experimental investigations. They may

deal with any phase of the work of an institution, such as administration, curriculum, student personnel service, instruction, or any other matter of immediate or remote concern to the institution. An institution will be requested to provide typed or printed copies of completed studies.

OPERATION OF THE ACCREDITING PROCEDURE

An institution considering accreditation should communicate in advance with the Office of the Secretary of the Commission on Colleges and Universities. This office will provide full information about the accrediting procedure, including the self-survey requirement, the consideration of the self-survey report by the Board of Review, the arrangements for a visit by an examining committee, and the handling of the examiners' report.

FUNCTIONS OF THE BOARD OF REVIEW

The Board of Review is the executive committee of the Commission on Colleges and Universities. It acts upon the application of an institution for accreditation and reports its decisions to the Commission on Colleges and Universities, which in turn makes its recommendations to the Executive Committee of the Association. Action so taken is final except that an institution may appeal to the Executive Committee of the Association.

In the performance of its functions the Board of Review will receive from the Secretary the formal reports of institutions, authorize surveys, appoint examiners, receive through the Secretary the reports of examiners and such additional information as he may lay before them, give full and impartial consideration to such reports, and take appropriate action thereon.

At the annual meeting the Board of

Review will report its actions, through the Secretary, to the Commission on Colleges and Universities and to the Executive Committee of the Association for acceptance, rejection, or modification, and later it will report to each applying institution the action taken upon its application. At the close of each annual meeting the Secretary will authorize the list of accredited institutions for publication.

FUNCTIONS OF THE EXAMINERS

Each institution applying for accreditation will be visited by examiners whose stay shall be long enough to enable them to form an estimate of the character of the institution and to determine the merit of its application. The examining team will include at least one member from an accredited institution of the same general type (e.g., junior college, teachers college, liberal arts college of simple organization, an institution of complex organization, etc.) as the institution being examined. Examiners will be selected in the light of special circumstances that may relate to the local situation. They will be informed on the nature of the institution being examined and on any special aspects involving public relations.

Before visiting an institution, the examiners will make a study of the schedules collected by the Secretary and will note any items that need verification or amplification at the institution. Upon each important issue involved, this *Manual* contains comparative data, examples of practice, or other criteria by means of which the data on the schedules can be evaluated.

The examiner's duties at the institution will be as follows:

1. To check the accuracy with which the schedules have been completed
2. To discuss with administrative officers and with the faculty the implications of the avail-

able data and such characteristics of the institution as are not covered in the schedules

3. To gather through conferences with staff members and students such additional facts and impressions as will complete the examiner's knowledge of the quality of the institution
4. To fill in and complete the scorecards used for making the pattern map

When two or more examiners join in the examination of an institution, as will be the customary procedure, they will naturally divide the work of inspection, in order that the time may be shortened and the work more thoroughly done. This method also provides that two or more competent judgments instead of one will be available for the guidance of the Board of Review.

Experience has shown that time is usually saved and a better understanding of the relations of the administrative officers to one another obtained if the inspectors hold a conference at the beginning of the survey with the president and the chief administrative officers. This meeting may then be followed by the conferences with the individual administrative officers.

INTERVIEW WITH THE PRESIDENT

The examiner's visit to an institution should be so timed as to meet the convenience of the administration. Ordinarily the first person approached in an institution will be the president. He and his administrative associates should be able to verify, as may be desired, the information given on the schedules, to answer any questions that have arisen in the minds of the examiners when the schedules were examined, to provide such additional information as may be desired, and to indicate what other officers may provide information not available in the president's office.

Some of the particular matters that should be discussed with the head of

the institution follow:

1. The purposes of the institution
2. The selection, appointment, and promotion of members of the faculty
3. The records kept by the institution concerning the qualifications and activities of faculty members
4. The quality of the present faculty—the areas in which it is strong or weak
5. The organization of the institution and the administrative units such as schools, colleges, and departments. Particular inquiry should be made as to how essential administrative functions are performed
6. The organization of the faculty, officers, committees, faculty units, and methods of function in meetings
7. The sources and character of the student body
8. The curriculum of the institution—its character, its adequacy, and its relation to the purposes of the institution
9. Instruction in the institution and methods of its improvement
10. The personnel of the board of trustees
11. The functions performed by the board and its committees
12. The degree to which the board has authority to make final decisions affecting the institution
13. The extent to which interested groups of the constituency influence the affairs of the institution in ways other than through the regularly constituted officials of the institution
14. The relation of the board to its executive officer
15. The type of the administrative organization, both in theory and in actual practice, and the smoothness with which the administrative system operates
16. The adequacy of the number of administrative officers
17. The qualifications of the various subordinate staff members in the administrative offices
18. The financial policies of the institution, particularly as they relate to the increasing development of stable sources of revenue for the support of the academic program
19. The general athletic situation, and its bearing on the instructional and financial program of the institution
20. The plans for the development of the physical plant, including plans with respect to features in which improvements, renovations, or additions are needed
21. The budgetary system, including methods of preparing the budget, the manner in which it is presented to the board for consideration, and the control of budget expenditures

22. The plan for managing invested funds, if any
23. The types of special educational activities maintained, such as summer session and extension activities; the reason for the maintenance of such features; and the policy with respect to their financing
24. The system of reports, including such matters as the president's annual report, the treasurer's annual report, reports of deans and department or division heads
25. Plans for fostering investigation and study of institutional problems
26. Institutional policies and practices in student personnel work

This interview should give the head of the institution an opportunity to interpret and evaluate the educational quality of his institution. He should express his judgment as to its strengths and weaknesses, its special contribution to the national structure of higher education, its needs, and lines of future growth and improvement.

INTERVIEW WITH THE DEAN

Although the functions of college deans vary from one institution to another, they normally relate to the faculty, to the curriculum, to instruction, and to student problems. In the case of a particular institution the examiner will already have some information, and more will have been gained from the interview with the president. In interviewing the dean, an effort should be made to discover the administrative activities of the dean; his relations to students; to the recruiting, appointment, and promotion of the faculty; to the organization, direction, and control of the faculty; to the curriculum and instruction; and also to other administrative officers, such as the president, the registrar, the business manager, and other deans. This interview should afford the dean the opportunity to reveal his judgment of the educational quality of his institution, his grasp of significant educational problems, and his awareness of current issues in higher education.

INTERVIEW WITH THE REGISTRAR

The chief aim of the interview with the registrar should be to verify and supplement the data submitted on the enrollment schedules and to secure such additional information regarding entrance requirements and practices, methods of registration, guidance, and enrollment as he may provide.

The registrar should give a clear explanation of his own activities and his relation to the activities of other officers, such as the president, deans, business manager, and members of the faculty. His authority and his relation to students should be clearly reported.

The examiner should examine the records of the registrar's office relating to admission, examinations, and student marks. Inquiry should be made as to the methods employed to report the progress of students to the faculty, to parents, and to the student himself.

INTERVIEW WITH BUSINESS OFFICERS

The major officer (or officers, if there are more than one) in charge of business and financial affairs should be interviewed for the purpose of verifying information regarding the financial position of the institution and obtaining information regarding the methods of conducting business affairs. The degree to which business affairs are centralized should be ascertained. The system of financial accounting should be examined to determine whether it conforms to accepted practices and whether the financial data reported are reasonably comparable with those obtained from other institutions. The system of budgetary control, the procedures used in purchasing supplies, and the plans for the collection of institutional revenue should be studied. The extent to which adequate supervision is exercised over the finances of

student activities should be investigated. The plans for handling invested funds, the custody of securities, the policies relating to investments, and the distribution of investments among various types of holdings should be discussed with the proper officer. The administrative organization for the care and operation of the physical plant should be studied. The reports previously submitted with respect to such items as income, expenditure, and indebtedness should be tested by a check of original records or audits, in order to insure that all items have been properly interpreted and correctly reported.

INTERVIEW WITH THE LIBRARIAN

The interview with the librarian should have three purposes:

1. To obtain his account of the manner in which records previously submitted to the Secretary's office were prepared
2. To secure his account of the library's relation to the general administration
3. To learn of the interest taken in the library by the instructional staff as a whole and with such reference to individual departments as he may consider important

The holdings of the library should be examined by a sampling procedure to ascertain the extent to which the distribution of holdings reflects the purposes of the institution, the curriculum offerings, and the enrolment by subjects and fields. Examinations should be made of such routines as are established for the recording of information concerning student use of the library and of particular parts of the collection. It is important that the librarian be asked to state uses to which such records are put wherever their use is not obvious.

INTERVIEWS WITH STUDENT
PERSONNEL OFFICERS

Included in the group of personnel officers are such individuals as the dean

of men, dean of women, director of the health service, nurse, placement officer, matrons of dormitories, and the coaching staff. In consultations with these various individuals the statement of duties and administrative relationships as reported on the schedules should be verified and the attitude toward students and student problems should be determined.

Inquiry should be made relative to procedures employed in counseling students. This will be done by ascertaining from student deans and others connected with personnel work the kinds of student problems evident at the institution and the methods used to aid students in dealing with them. The effectiveness of these procedures and of the institutional agencies for student guidance of extra-curriculum activities, scholarships, loan funds, and health and placement service should be studied.

As a further basis for evaluation, the records which are kept of students' personal histories, of extra-curriculum activities, of scholarship funds, of loan funds, and of the health and placement service should be examined.

INTERVIEWS WITH STAFF MEMBERS

From the data provided in the various schedules, from suggestions direct and indirect, and from the president and deans a number of staff members should be selected for interview. At times, the examiner may meet small groups; at other times, individual interviews may be more desirable.

In staff interviews, the fundamental matters for discussion are: students, curriculum, library, and instruction; although side lights upon the administration and the tone of the institution will frequently be secured. Appropriate inquiries may be made concerning the organization of the curriculum, the need for expansion or restriction, the

methods of handling students, the selection of students, the means of improving instruction, the library, and similar matters. These interviews should reveal the degree to which the faculty is aware of current trends in higher education, of the advent of new methods of student management, of the reorganization of curriculums, of the changing emphasis upon examination practices and the need for their improvement, and of the contribution of experimental studies to educational improvement. In particular, they should reveal the instructor's familiarity with teaching development in his own subject.

INTERVIEWS WITH STUDENTS

It is advisable to consult different students relative to various aspects of the institution. These conferences should be made as informal as possible during visits to fraternity and sorority houses, dormitories, the library, or other places that afford opportunities for informal contacts.

EXAMINATION OF PLANT AND INSTRUCTIONAL FACILITIES

Inspection will be made of the physical plant, including buildings, grounds, and equipment.

REPORT OF EXAMINERS

Following the survey of an institution, the examiners will file the completed schedules, scorecards, and a written report with the Secretary. This report should be based upon the schedules submitted by the institution and the additional information secured during the inspectional visit. It should express the judgment of the examiners upon the educational quality of an institution and should contain a definite recommendation as to whether the application of the institution should be approved or declined. A clear state-

ment of the grounds for the recommendation should be given.

It is not intended that the examiner's judgment will be determined wholly by the factual data available. It is his function to evaluate these data as accurately as possible, but in his inspectional contacts he will gather numerous impressions of existing conditions of a less objective and less tangible character that have a bearing upon the character of the institution. In the light of his total knowledge and impression of the institution, it will be his duty to form a judgment of the competence of the institution as an agency for the higher education of youth. It is this composite judgment of the educational competence of an institution rather than the meticulous conformity to detailed criteria that should be the basis of the recommendation to the Board of Review.

INSTITUTIONAL PATTERN

With the abolition of standards reliance devolves upon the evaluation of an institution as a whole. To make this policy effective, it is necessary to secure accurate information concerning all institutional characteristics which contribute significantly to the character of the institution as a whole.

INDIVIDUALITY OF INSTITUTIONS

The section on individuality of institutions in the Statement of Policy does not imply that all differences are important or that all variations in institutional pattern and activity are justified. Many superficial differences have no significance in determining the educational quality of an institution. These will be disregarded in accrediting. Other departures from general practice may really detract from the educational services of an institution and justify the Association in withholding recognition. There are, how-

ever, many variations among colleges that appear to be educationally sound; it shall be the policy of the Association to foster and encourage variations of this type.

A brief statement of the areas in which such variations may occur is given here. Many of the implications of this section will be developed in the subsequent treatment of the procedures to be employed in passing judgment upon an institution. The general statements made here will be useful chiefly in suggesting the need for caution in applying general policies of accrediting to individual institutions.

DIFFERENCE OF PURPOSE

Higher education has many and diverse purposes. In some cases an institution will limit itself to a single purpose or to a limited group of purposes. Colleges of engineering, medical schools, and teachers colleges are illustrations. Accrediting methods should protect an institution in its unique purposes and encourage it to be the best possible school of its type. So long as a school adheres to a limited purpose, it should not be under pressure to become a different type of school. The expansion or modification of its curriculum, for instance, should be determined by the needs of the particular type of education to which it is committed. A change in the major purposes of an institution will constitute grounds for a re-evaluation of the institution in terms of its modified purposes.

DIFFERENCES IN STUDENT ABILITIES

Over a period of years institutions tend to attract students of a particular type. This tendency is illustrated by uniformity in the intellectual level of entering Freshmen. In this respect wide differences prevail among institutions. Overlappings are common, but central tendencies are fairly distinct,

and it is evident that a given institution may minister to a body of young people who, because of differences in intellectual powers, would be out of place in certain other institutions. It is not desirable that accrediting procedures should attempt to reduce all colleges to a common intellectual standard—for instance, by fixing a minimal score on an examination as an essential condition for entrance or graduation.

The Association may legitimately expect an institution to produce evidence that the significant characteristics of its student group are known to those responsible for administration and instruction and that reasonable efforts are made to adjust the activities to the needs of the particular body of students which the institution admits. An institution, however, should not be under pressure to select a particular type of student body, except in so far as the unique purposes of the institution may require students of a particular type.

DIFFERENCES IN CURRICULUM AND INSTRUCTION

Inasmuch as the curriculum is merely the means by which an institution seeks to accomplish certain purposes, it is clear that curriculums cannot be the same for all institutions if purposes vary. It is legitimate to inquire whether a curriculum is consonant with announced purposes, whether it is taught by qualified instructors, and whether it is adequately supported financially and by laboratory and library facilities. Beyond such basic matters as these the institution should be free to select the content and procedures of instruction. Intimate with curriculum and instruction are standards of student achievement. The matter of such standards should remain clearly within the jurisdiction of individual institutions. What the Associa-

tion will insist upon is sincerity of performance, honesty and fairness with students, and the absence of pretense that the institution is competent to perform certain functions which it is not.

DIFFERENCES IN ADMINISTRATION

Variations from the usual plans of institutional organization and administration may be justified in many cases. The competence of the administrative personnel is important, and inquiry may be made as to whether all the essential administrative functions are performed economically and in such a way as to facilitate educational purposes. Such inquiry should not operate to impose a standardized plan of administrative organization that will be exactly the same for every institution. Initiative in arranging the details of administrative organization should reside with those responsible for the conduct of the institution, although suggestions may be offered regarding plans that at present seem to be operating most effectively.

OTHER VARIATIONS

The foregoing enumeration of the areas in which the individuality of an institution should be protected is not inclusive but illustrative. Other important variations may occur in student personnel service, in the amount and sources of support, in plant, in extra-curriculum activities, and in many other matters. The crucial question concerning any such variation is: Does it further the achievement of the purposes of the institution; does it detract from such achievement; or is it merely negligible? Unless there is clear evidence that variations are harmful to the declared educational purposes of an institution, they will not be regarded unfavorably by the Association.

ENCOURAGEMENT OF VARIATION

In matters so intimately related to life as education should be, it is of the utmost importance that institutions be kept fluid and adaptable. The constant and continuous effort to improve its work through well-conceived and carefully directed educational experiments is a powerful instrument in keeping an educational institution alert and its work vital. For this reason the Association looks upon efforts at educational experiment as an evidence of vitality in an institution. In

fact, it might well feel concerned if, over a period of time, no such efforts were in evidence in an accredited institution. Attention may properly be called to the qualification noted in this *Manual* that experiments of merit must be "well-conceived and carefully directed." The attempt merely to do something new may be deplorable, indeed, rather than meritorious. Opportunity will be given for each institution to set forth any unique features or practices which, in its judgment, should be protected in accrediting.

PROGRAMS OF POST-BACCALAUREATE STUDY FOR TEACHERS
LEADING TO THE MASTER'S DEGREE

A STATEMENT OF POLICY ADOPTED BY THE COMMISSION ON COLLEGES AND UNIVERSITIES

April 11, 1956

Under the current policies of the Commission on Colleges and Universities of the North Central Association, accredited higher institutions come under review when they move from undergraduate education into the offering of graduate programs. In recent years most of these extensions into graduate study have been in the area of teacher education. In attempting to evaluate these new programs, the Commission has found itself handicapped by the existence of a variety of points of view concerning graduate study for elementary and secondary school teachers. Accordingly, the Commission offers the following statement of policy as an outline of the characteristics of acceptable post-baccalaureate study for classroom teachers.

As a preface to this statement of policy, the Commission makes these comments:

1. It is important to recognize that there are several appropriate types of Master's degree programs for elementary and secondary school personnel. A few teachers may profit most

from a graduate program in a subject-matter field such as mathematics or English, leading to a conventional Master's degree. Counselors, supervisors, and other school specialists are often best trained through a graduate major in the field of Education. The statement that follows describes the characteristics of an acceptable graduate program of a third type—a program intended specifically for the development of master teachers rather than subject-matter or technical specialists.

2. The Commission makes a distinction between a program of study for teachers and one for the preparation of school administrators. An institution cannot justify as a program for teachers a curriculum that is heavily weighted with professional courses in administration.

3. The Commission makes a distinction between a graduate program for teachers leading to a Master's degree and a program that consists only of an additional year of undergraduate study beyond the baccalaureate de-

gree. Fifth year undergraduate programs cannot be considered as acceptable programs leading to an advanced degree. (In another field of study undergraduate liberal arts institutions offer in cooperation with engineering colleges a program consisting of five years of undergraduate study at the completion of which the student receives two *Bachelor's* degrees, an Arts degree and a Science degree.)

A graduate program should involve work at a higher level than that characterizing undergraduate study.

4. The Commission observes that graduate study at the Master's degree level for teachers is usually terminal as distinguished from graduate work which is a step toward the Doctor's degree.

A. STUDENTS

The students admitted to a graduate program for teachers should be expected to perform academically at a level higher than that required of the average undergraduate. Since any program of instruction tends to adapt itself to the level of the students enrolled, it is important that the students in a graduate program for teachers be high in general ability. The institution should devise means of selecting students with the requisite competence. This implies that institutions will employ a policy of selective admission for teacher candidates at the undergraduate level as well, and will recommend for certification only those well qualified. If the institution intends to offer a program that is genuinely of graduate caliber, it must resist the temptation to accept inadequate standards of preparation in the desire to "serve the needs" of every person within its geographical area.

In a program of advanced study for teachers, it seems reasonable to expect that the majority of the students will have had some experience in teaching.

The courses of instruction can thus be of such a nature that they will take into account the experience and maturity of the students. It seems reasonable at the present time to expect that the majority of the students will have qualified for certification under the laws of the state in which they are teaching or plan to teach. The structure of the program should not preclude the admission of persons without teaching experience or without certification, but these persons would normally be in the minority.

The institution should be able to demonstrate that there is enough demand for a graduate program for teachers in its service area to assure a sufficient number of students for a well-developed program. The students should have opportunities to discuss problems, issues, experiments, and opinions with other students having similar interests, backgrounds, and plans.

B. FINANCING THE PROGRAM

Graduate instruction is proportionally more expensive than undergraduate instruction. Graduate instructors teach fewer classes; fewer students are enrolled in graduate classes; and additional facilities—especially in the library—are required.

An institution initiating a graduate program should expect to enlarge its academic staff. A satisfactory graduate program cannot be developed by adding responsibilities for graduate instruction to persons who already devote full time to undergraduate teaching.

An institution should also expect to increase its library budget before it offers graduate work. Students studying at the graduate level will require a greater number and more specialized types of books, periodicals, yearbooks, pamphlets, courses of study and curricula, microfilms, movies, and other

visual materials than will undergraduate students.

Some increase in facilities in the form of seminar rooms may be required.

Experience shows that an acceptable graduate program will not pay for itself. An institution contemplating graduate instruction should not deceive itself by thinking it can have a high caliber program on a self-supporting and casual basis. No institution should contemplate graduate instruction unless its undergraduate program is already adequately financed. The additional students attracted by the graduate program will neither absorb the expense of the graduate program nor provide a hitherto untapped source of income for the support of the undergraduate program. An institution should be able to show in some detail the expenses contemplated in connection with the offering of the graduate program and how these expenses are to be met.

In short, it is reasonable to expect that an institution initiating a program of graduate instruction has provided for an appreciable increase in its overall budget.

C. RELATIONSHIP TO THE UNDERGRADUATE PROGRAM

An institution should not enter a program of graduate instruction unless it already has a better than average undergraduate program. Because of a certain amount of overlapping in the staff, the caliber of the graduate instruction will in part be a reflection of the caliber of instruction at the undergraduate level. The caliber of the graduate student body will bear a relation to the caliber of the undergraduate students. The intellectual tone of the graduate program will be an extension of that of the undergraduate division. In both administration and fi-

nancing the graduate program will be affected by the undergraduate division.

An institution should also recognize that the addition of a graduate program will have significant effects on its undergraduate program. An adequate graduate program involves much more than simply adding courses to the existing undergraduate program. Unless substantial additional resources are forthcoming, the added burden imposed by the initiation of a graduate program is quite likely to reduce a good undergraduate program to mediocrity. Resources—staff, finances, facilities—which are sufficient for the operation of an adequate undergraduate program only will not support both an undergraduate and a graduate program.

In the interest of instituting and maintaining a level of work that is truly of graduate caliber the number of courses open to both graduate and undergraduate students should be limited. Unless there is a sufficient number of courses open to graduate students only, the graduate program is likely to be very little different from the undergraduate program.

D. THE CURRICULUM

It is not the function of the Commission to describe in detail the organizational structure of a program of advanced study for teachers. Each institution must determine the details of its program in the light of its own purposes and circumstances. The Commission does, however, wish to call attention to some of the significant problems and to suggest possible lines of development.

An initial problem is that of determining the relative emphasis to be placed on satisfying the highly specific needs of the individual student as against maintaining a highly pre-

scribed program. Since the essential purpose of the program is to educate master teachers, considerable attention should be given to the specific needs of the individual student. These needs should be evaluated, however, in terms of a clear conception of the competencies and qualities of an effective teacher. A highly prescribed course of study would not seem suitable in a program in which there will be persons of different levels of maturity, training, and experience. On the other hand, without some carefully laid guidelines it is too easy to identify student needs with casual demand or with whatever happens to be available.

The academic preparation of a teacher involves three areas—development of breadth and depth in general education, in professional education, and in the teaching field. A graduate program for the teacher will include courses designed to advance him in all of these areas, i.e. graduate courses in general education, professional education, and the teaching field. The relative emphasis placed on each of these elements should be determined by the institution in the light of its own philosophy of education.

Another problem is the determination of the amount of undergraduate level work that may properly be considered as part of a graduate program. It is conceivable that a program consisting almost entirely of undergraduate courses would add in significant ways to the student's general background and thus to his effectiveness as a teacher. The Commission feels, however, that such a program cannot properly be called a graduate program. Graduate study should be of an advanced nature with the emphasis on original and mature thinking rather than on filling gaps in one's undergraduate training. While some allowance can be made for undergraduate courses,

the amount of graduate credit permitted for this work should be kept at a minimum. The Commission would seriously question the graduate caliber of a program in which much of the work appeared to be elementary. This is true with respect to any of the three areas mentioned above.

Study in that part of the graduate program designated as the teaching area should be of an advanced nature. Where advanced study in the teaching field is precluded by lack of preparation at a lower level, graduate credit should not be given for courses required to bring the student to the point at which he can profitably engage in advanced study. For example, advanced algebra and solid geometry are normally considered secondary school or lower division college courses. There would be little reason for permitting a graduate student to take these courses for graduate credit simply because he had failed to take them as an undergraduate. Unless some such principle is followed the distinction between graduate and undergraduate work is quickly erased, and another principle begins to operate, namely, that graduate work is whatever a student happens to take after receiving his Bachelor's degree.

Likewise, removal of deficiencies in the area of undergraduate professional education which prepares a student for initial certification should not be considered as part of a Master's degree program.

While courses of a general education character at the graduate level may not assume a great deal of previous training in the area, such courses should nevertheless take into consideration the maturity of the graduate student. Since elementary courses in subject-matter areas ordinarily assume that a sequence of courses will follow, and are organized as preparation for

one who will continue to study in the field, they are not usually appropriate for graduate students. Moreover, general education courses developed especially for graduate students are preferable to courses developed primarily for undergraduates.

The Commission recognizes that a distinction may be made between the preparation of elementary school teachers and that of secondary school teachers. The graduate program for the elementary school teacher may well be more general than would be appropriate for secondary school teachers.

A third problem is the determination of the place of professional courses in Education. While a certain portion of the program can properly be devoted to studies in professional education, a program consisting almost entirely of professional courses is not adequate for teachers. The professional courses must be kept in proper proportion to courses in the teaching field and in general education.

A fourth problem involves the determination of the place of research in a program designed to prepare master teachers. The traditional departmental Master's degree program is designed to produce the expert in a particular subject-matter field. The degree ordinarily marks a step toward the Doctor's degree, which with few exceptions is earned on the basis of the completion of a program of research. The departmental Master's degree has thus come to be a first research degree. Since, however, the purpose of graduate study in teaching is not to train experts in research but to contribute directly to effectiveness in teaching, the question may be raised as to whether research properly has a place in such a program at all.

The problem is complicated by the fact that recently in some fields the departmental Master's degree has lost

some of its research emphasis. In some institutions the Master's degree may now be taken under alternate plans. The student may elect to take the degree with thesis, which presumably is a piece of original research, or with one or more papers, which ordinarily involve little or no original research.

One of the bases upon which a decision on the place of research should be made seems to be the purely utilitarian one of whether or to what extent research will contribute to the student's effectiveness as a teacher. Will the student be a more effective teacher, for example, from having conceived and carried through a significant project in the area of learning theory? Is research to be accounted a fourth area distinct from the student's preparation in his teaching field, his preparation in general education, and his preparation in professional education? The graduate program for teachers will normally encompass a year of full-time study, totalling approximately thirty semester hours of classwork. Can the student, within the limited amount of time afforded in the Master's program, develop a significant problem and arrive at a significant answer?

A distinction is sometimes made between education for the producer of research and education for the consumer of research. Most doctoral programs are intended for the producer of research. The doctoral student ordinarily is expected to develop skills in handling problems and to demonstrate the ability to produce an "original contribution to knowledge." Many departmental Master's programs are minor editions of research-oriented doctoral programs. However, the program of advanced study for teachers does not propose to train specialists in a departmental subject-matter area. Thus, it is frequently contended that teachers should be educated as con-

sumers of research rather than as producers of research. It is said that it is more important for the teacher to keep abreast of the latest research than for him to engage in research, and that the emphasis in the graduate program for teachers should be upon developing skill in reading critically and in drawing logical inferences.

Making a distinction between educating the producer of research and educating the consumer of research does not solve the problem, however. Shall the consumer of research be trained, for example, in interpretation of statistical methods of research, or in the interpretation of historical methods of research, or in an understanding of experimental design, or in all three? How many courses does he require? Is it necessary for even the consumer of research to engage in a certain amount of research before he can evaluate other research? Or is a broad acquaintance with the language of the field and some training in problem solving and critical thinking sufficient for the consumer of research?

As a basis for a policy on the place of research in a graduate program for teachers, the Commission reiterates the following propositions relative to the orientation of the program:

1. Training in research is not in itself an end in a graduate program for teachers.
2. The time which a student in a graduate program for teachers can actively devote to research will be relatively restricted.
3. Graduate study is more than the amassing of course credits. It demands a certain level of maturity and the ability to make critical judgments.
4. The program of graduate study in a teaching field should prepare the student to face teaching problems in a critical spirit and to seek continuous improvement of his teaching through study and experimentation.

In the light of these propositions, the Commission has reached the following conclusions:

1. The graduate student should be acquainted with the language of his own field and the language of the field of Education. He should also be acquainted with the methods of research in both fields. Acquaintance with the language of the field and with the methods of research in the field can probably be more effectively secured through experiences in a number of courses that are not strictly research courses than in a single so-called research methods course.

2. Acquaintance with the language of the field and methods of research in the field cannot, however, be secured if the matter is left purely to chance. Each student should be given the opportunity to gain the requisite knowledge within—though not exclusively so—the structure of the required courses of the program.

3. The graduate student should be given an opportunity to prepare some papers in which he weighs results, evaluates, and interprets. These papers should probably not be formal research papers. They may be papers prepared as part of the regular course work.

4. Where possible, the instructor of any course should make a conscious effort to acquaint the student with some of the research reflecting upon the course and with the sources of research reports about the material covered in the course. It seems logical to suppose, furthermore, that when there is opportunity, the instructor will point out and evaluate relevant research data in support of his presentation.

5. There seems to be merit in providing for graduate students an opportunity to engage in a number of seminars in which the problems dealt with are significant, manageable, and relevant to the field. Such seminar experience might be more valuable than work on an extended research project.

E. STAFF

The faculty assigned to teach graduate courses should be carefully selected on the basis of competency in the field, educational background, skill in teaching, and interest. It is probably unnecessary to say that persons teaching at the graduate level should themselves have done a substantial amount of advanced work. Certainly members of a graduate faculty should have carried on study beyond the Master's degree level. Furthermore, although the graduate program for teachers is not research oriented, it is expected that there will be a larger proportion

of persons with the Doctor's degree in the graduate program than in the undergraduate program.

There should be a graduate faculty designated as such with a schedule of classes appropriate to the increased amount of direct student-faculty contact required in a graduate program. The graduate faculty should not consist of persons who are teaching graduate courses in addition to their normal load of undergraduate courses. The graduate faculty should have ample opportunity for individual conferences and instruction. An institution establishing a program of graduate instruction will require additional staff members to carry on the major part of the graduate instruction.

Provision should be made for the formal organization of the faculty members responsible for the graduate program. As a graduate faculty they should have the opportunity to meet and discuss problems and plans for the operation of the program. The minimum organizational structure should provide for a graduate council or committee and a director or dean who will assume the primary responsibility for the direction of the program. The details of organization will depend upon the overall organization of the institution and the size and requirements of the graduate program.

F. GENERAL

The amount of extension and off-campus study which may properly be considered a part of the graduate program should be limited. With few exceptions the graduate work should be on the campus under the regular graduate faculty where the library

and other facilities of the institution are readily available. While the Commission recognizes that restricting the program to the campus and to regular periods of instruction will work a hardship on some of the persons who wish to undertake the program, it should be emphasized that this is a description of a *graduate* program and that the concern should not be with the ease of securing a degree but with the maintenance of a quality program.

The time permitted for the completion of the program should be limited. It is probable that a Master's degree program which is completed course by course over a period of six to seven years loses some of its impact. There is good reason to believe that the student gains by being involved with others in a concentrated block of courses.

An institution embarking upon a program of graduate instruction for teachers should be strong not only in the field of professional education but in a number of content areas as well. The undergraduate program should as a whole be above average. An institution should also restrict its efforts to those subject-matter areas in which it is doing its best work.

An institution planning to offer instruction at the graduate level should be able to show that it is doing so only after a considerable period of intensive study. The institution should also be able to demonstrate that there is a need for such a program in the area which it serves and should give evidence that it has sufficient financial resources available to operate the additional program.

III. LIST OF ACCREDITED INSTITUTIONS OF HIGHER EDUCATION

July 1, 1956

Explanation of dates.—The dates listed are dates of membership. The first accredited list was published in 1913; no institution was accredited prior to that time.

A dash connecting two dates indicates continuous accreditation during the period specified, e.g., 1915-1919 means continuous accreditation from 1915 to 1919 inclusive. A date followed by a dash indicates continuous accreditation to and including the current year. A semicolon indicates that the institution was on the list for the year or years specified but that it was not on the list for the following year,

unless the next entry shows a change of classification for the latter years.

Designation of extent of program.—The symbol (M) or (D) after the name of an institution indicates that the institution offers a graduate program leading to the Master's or Doctor's degree, respectively, and that the accreditation of the institution includes its graduate work. Those institutions which are listed neither as junior colleges nor as having graduate programs are Bachelor's degree-granting institutions or institutions with graduate programs that have not yet been accredited.

COLLEGES FOR NEGRO YOUTH

The following colleges for Negro youth, although not members of the Association, were granted an accredited status by the Southern Association of Colleges and Secondary Schools at their annual meeting in Memphis, Tennessee, December 4, 1953, on recommendation of the Commission on Colleges and Universities:

SENIOR COLLEGES

A. and T. College of North Carolina, Greensboro,
 North Carolina (1936)
 Alabama A. and M. College, Normal, Alabama
 (1946)
 Alabama State College for Negroes, Mont-
 gomery, Alabama (1946)
 Albany State College, Albany, Georgia (1951)
 Alcorn A. and M. College, Alcorn, Mississippi
 (1948)
 Allen University, Columbia, South Carolina
 (1947)
 Atlanta University, Atlanta, Georgia (1932)
 Barber Scotia College, Concord, North Carolina
 (1949)
 Benedict College, Columbia, South Carolina
 (1946)
 Bennett College, Greensboro, North Carolina
 (1935)
 Bethune-Cookman College, Daytona Beach,
 Florida (1947)
 Bishop College, Marshall, Texas (1947)
 Claffin University, Orangeburg, South Carolina
 (1947)
 Clark College, Atlanta, Georgia (1941)
 Dillard University, New Orleans, Louisiana
 (1937)
 Elizabeth City State Teachers College, Eliza-
 beth City, North Carolina (1947)
 Fayetteville State Teachers College, Fayette-
 ville, North Carolina (1947)
 Fisk University, Nashville, Tennessee (1930)

Florida A. and M. College, Tallahassee, Florida
 (1935)
 Florida N. and I. Memorial College, St. Augus-
 tine, Florida (1951)
 Fort Valley State College, Fort Valley, Georgia
 (1951)
 Grambling College, Grambling, Louisiana (1949)
 Hampton Institute, Hampton, Virginia (1932)
 Huston-Tillotson College, Austin, Texas (1934)
 Jackson College, Jackson, Mississippi (1948)
 Jarvis Christian College, Hawkins, Texas (1950)
 Johnson C. Smith University, Charlotte, North
 Carolina (1933)
 Kentucky State College, Frankfort, Kentucky
 (1939)
 Knoxville College, Knoxville, Tennessee (1948)
 Lane College, Jackson, Tennessee (1949)
 LeMoyné College, Memphis, Tennessee (1939)
 Livingstone College, Salisbury, North Carolina
 (1944)
 Miles College, Birmingham, Alabama (1950)
 Morehouse College, Atlanta, Georgia (1932)
 Morris Brown College, Atlanta, Georgia (1941)
 North Carolina College at Durham, Durham,
 North Carolina (1937)
 Paine College, Augusta, Georgia (1944)
 Prairie View A. and M. College, Prairie View,
 Texas (1934)
 Rust College, Holly Springs, Mississippi (1949)
 St. Augustine's College, Raleigh, North Carolina
 (1942)
 St. Paul's Polytechnic Institute, Lawrenceville,
 Virginia (1950)

Savannah State College, Savannah, Georgia (1951)
 Shaw University, Raleigh, North Carolina (1943)
 Southern University, Baton Rouge, Louisiana (1937)
 Spelman College, Atlanta, Georgia (1932)
 State A. and M. College, Orangeburg, South Carolina (1941)
 Stillman College, Tuscaloosa, Alabama (1953)
 Talladega College, Talladega, Alabama (1931)
 Tennessee A. and I. State University, Nashville, Tennessee (1946)
 Texas College, Tyler, Texas (1948)
 Texas Southern University, Houston, Texas (1948)
 Tougaloo College, Tougaloo, Mississippi (1953)
 Tuskegee Institute, Tuskegee, Alabama (1933)
 Virginia State College, Petersburg, Virginia (1935)

Virginia Union University, Richmond, Virginia (1935)
 Wiley College, Marshall, Texas (1933)
 Winston-Salem Teachers College, Winston-Salem, North Carolina (1947)
 Xavier University, New Orleans, Louisiana (1937)

JUNIOR COLLEGES

Daniel Payne College, Birmingham, Alabama (1955)
 Edward Waters College, Jacksonville, Florida (1955)
 Morristown College, Morristown, Tennessee (1947)
 St. Philip's College, San Antonio, Texas (1951)
 Voorhees School and Junior College, Denmark, South Carolina (1946)

Proceedings of the Commission on Secondary Schools

I. REPORT OF THE COMMISSION

ON SATURDAY, APRIL 7, the Sixty-First Annual Meeting of the Commission on Secondary Schools of the North Central Association of Colleges and Secondary Schools opened with a 7:30 meeting of the Dependents' Schools Committee at the Palmer House, in Chicago. The next day the Administrative Committee met at 10:00 A.M. The State Chairmen and the Administrative Committee followed with a meeting on Monday. Much of the time was spent in discussing problems common to all and arriving at satisfactory solutions of those problems.

Chairman Floyd A. Miller had made extensive arrangements for members of reviewing committees, including a card file of individuals who had indicated a desire to work on reviewing committees; name cards for lapel pockets, and admittance cards for the chairmen of the respective Committees on which they were to work. These features helped to do away with much of the confusion which ordinarily obtains in assigning individuals to committees and getting work started. No persons were assigned to Committees after 9:00 A.M., Tuesday, April 10.

Promptly at 9:00 A.M. on the above date, a total of 452 individuals sat down to review the reports of 3,398 high schools. Before the end of the day, the work of the Reviewing Committees was completed. At 4:00 P.M., the chairmen, assistant chairmen, and secretaries of the Reviewing Committees met with the nineteen State Chairmen to report the results of the day's work and to permit any State Chairman who might question the decision of the Reviewing Committee about an individual school within his state to seek information concerning the reasons for the recommendation the Committee proposed, and clear up all questions prior to the presentation of the recommendations of the Reviewing Committees to the Commission at its final business session. This procedure made it possible to discuss, clarify, and thus avoid differences of opinion. When the reports of the various reviewing chairmen were completed, the State Chairmen expressed themselves as satisfied with the findings of the Reviewing Committees and extended to them their thanks for a big job well done. This meeting was followed by a short session of the Administrative Committee to take official action on some of the recommendations of the State Chairmen.

The "Buzz Sessions" introduced by Chairman Miller for the first time last year were continued with the same fine results. These groups met at 2:00 P.M. on Tuesday, April 10. These meetings were attended by those who had completed their reviewing activities and by any others who were interested. Ely Feistner, principal of the Nebraska City (Neb.) high school was the general chairman. The chairman and recorder of each group were as follows:

Group 1—"Problems Involved in Pupil Transportation"

Chairman: W. Barnie Caton, Superintendent of Schools, Alamogordo, New Mexico

Recorder: Delmas Miller, Principal, University High School, Morgantown, West Virginia

Group 2—"Disciplinary Problems and Procedures in 1956"

Chairman: Lawrence W. Hanson, Principal, Central High School, Grand Forks, North Dakota

Recorder: Paul Spuller, Principal, Central High School, Fort Wayne, Indiana

Group 3—"Enlisting the Aid of Parents in Combatting Excesses in School Activities"

Chairman: William F. Carlson, Principal, High School, Northfield, Minnesota

Recorder: Merly Welch, Principal, Shawnee Mission High School, Merriam, Kansas

Group 4—"How to Meet the Problems Which Result from Increased Enrollments in Large Secondary Schools"

Chairman: Roy Hinderman, Deputy Superintendent, Denver Public Schools, Denver, Colorado

Recorder: B. S. Bradbury, Principal, Wyoming High School, Cincinnati, Ohio

Group 5—"How to Meet the Problems Which Result from Increased Enrollments in Small Secondary Schools"

Chairman: C. C. Holt, Principal of High School, Princeton, Illinois

Recorder: L. S. Curtis, Principal of High School, Casa Grande, Arizona

The first business meeting of the Commission was held on Wednesday, April 11, at 9:30 A.M., with Chairman Floyd A. Miller presiding. At this time the Secretary, Alva J. Gibson, presented his report, which by custom has become a brief review of the activities of the Administrative Committee since the last annual meeting. He also made brief reports for the Dependents' Schools Committee and for the Report Forms Advisory Committee. Other reports were made by the following individuals for their respective committees:

Otto Hughes, *Activities Committee*

Lowell B. Fisher, *The Study of the United States Armed Forces Institute for the Department of Defense*

Previous to the meeting, Chairman Miller had appointed a Nominating Committee composed of the following individuals:

Chairman, Ralph Stinson, State Department of Education, Topeka, Kansas
Leroy L. Cook, Principal of Salem-Washington Township High School, Salem, Indiana

Robert Crowell, University of Arizona, Tucson, Arizona

The report of the Nominating Committee was called for. Mr. Stinson, reporting for the Committee, placed the following names in nomination:

For the Chairman of the Commission—*Ralph C. Johnson,* Principal of Wyandotte High School, Kansas City, Kansas

For member of the Administrative Committee—L. A. Van Dyke, University of Iowa, Iowa City, Iowa

For the Class of 1959:

R. R. Meyers, Principal, High School, Mishawaka, Indiana

J. E. McAdam, Director, University School, Iowa City, Iowa

J. Harold Rose, Principal, High School, Whitefish Bay, Wisconsin

Kent Leach, University of Michigan, Ann Arbor, Michigan

N. T. Thorpe, Principal, University High School, Lincoln, Nebraska

F. L. Simmons, Principal, East High School, Cleveland, Ohio

The report of the Committee was accepted and the Chairman then called for nominations from the floor. None being offered, it was moved and seconded that the individuals named by the Nominating Committee be elected to the respective offices. Motion carried unanimously. The meeting adjourned at 11:30 A.M.

The final business meeting of the Commission was held at 2:00 P.M. on Wednesday, April 11.

After roll call by the Secretary, the chairman of each of the Reviewing Committees reported to the Commission and made the following recommendations, which were accepted unanimously:

| | |
|-----------------------------------|-------|
| For unqualified approval..... | 2,024 |
| To be advised..... | 1,126 |
| To be warned..... | 172 |
| Schools dropped or withdrawn..... | 21 |
| New schools to be added..... | 76 |

Total membership of secondary schools in the Association now stands at 3,398.

The meeting was adjourned at 4:20 P.M.

II. COMPOSITION OF THE REVIEWING COMMITTEES

REVIEWING COMMITTEE ON SCHOOLS TO BE UNQUALIFIEDLY RECOMMENDED

Chairman: ARTHUR MILWARD, High School Principal, Mt. Vernon, Illinois

Secretary: LAWRENCE LEMONS, High School Principal, Scottsbluff, Nebraska

SUB-COMMITTEE A

Chairman: J. ARTHUR HERRON, Superintendent of Schools, Blackwell, Oklahoma

Secretary: R. H. BRAUN, High School Principal, Urbana, Illinois

Assistant Secretaries:

LEWIS MAHONEY, High School Principal, Hot Springs, Arkansas

L. W. GREEN, Superintendent of Schools, Gypsum, Colorado

A. J. KIBURZ, JR., High School Principal, Dundee, Illinois

LLOYD S. HENSON, Superintendent of Schools, Centralia, Illinois

MAYNARD G. WOLFE, Principal of Lincoln High School, Cambridge City, Indiana

ROGER BERRY, High School Principal, Davenport, Iowa

KENNETH HILL, Superintendent of Schools, Stafford, Kansas

J. J. RIEMERSMA, High School Principal, Holland, Michigan

M. E. ROWLEY, High School Principal, Ashtabula, Ohio

JOSEPH STORTS, High School Principal, Zanesville, Ohio

SUB-COMMITTEE B

Chairman: W. EARL HARMON, High School Principal, Creston, Iowa

Secretary: LOUIS J. ADOLPHSEN, High School Principal, Albert Lea, Minnesota

Assistant Secretaries:

C. B. RYKKEN, High School Principal, Alexandria, Minnesota
 C. O. McDONALD, Principal of Hazelwood High School, St. Louis, Missouri
 THEODORE SKILLSTAD, High School Principal, Norfolk, Nebraska
 NOEL VAUGHAN, Superintendent of Schools, Healdton, Oklahoma

V. POLICIES, REGULATIONS, AND CRITERIA FOR THE APPROVAL OF SECONDARY SCHOOLS

GUIDING PRINCIPLES

I. An institution should be judged upon the basis of the total pattern it presents as an institution of its type. While it seems necessary that institutions be judged in terms of particular characteristics, it should be recognized that wide variations will appear in the degree of success achieved.

II. It should be accepted as a principle of procedure that deficiency in one field may be compensated for by strength in other fields—no school should be denied accreditation because it fails to meet a specific standard, if its total pattern of achievement is good.

III. A school should be judged, in so far as is possible, in terms of its own philosophy and the purpose which it serves in its own community. The fact should be recognized that individual differences exist among schools and among communities.

IV. Criteria should be flexible, and

of a type that can readily adjust themselves to changing conditions.

V. Objective criteria should be based upon a sufficient amount of research and experimentation to establish their validity as measuring instruments.

VI. While it seems desirable that criteria regard as basic certain characteristics, such as faculty preparation, the intellectual and moral tone of a school, the nature of the school plant, the adequacy of equipment and supplies, the quality of the school library and library service, the condition of the records, the policies of the board of education, the financial status, the teaching load, and the educational program, it should be recognized that considerable divergence from normal standards may occur in one of these characteristics without greatly detracting from the educational merits of an institution. Uniformity in every detail stifles educational experimentation and

is not only unnecessary but undesirable.

VII. Criteria, to be of maximum value, should be stimulating and conducive to educational growth; they should be instruments for continuous self-evaluation and should provide the incentive to strive constantly toward higher goals of achievement.

POLICIES OF THE COMMISSION ON SECONDARY SCHOOLS

POLICY I

A school which has submitted its annual report to the State Committee which is in the highest class of schools as officially listed by the properly constituted educational authorities of the state and which has been approved continuously for five years shall not be dropped without a year's warning except by a three-fourths vote of the members of the Commission present. A school which has not been approved continuously for five years may be dropped without warning.

POLICY II

It is the policy of the Commission to recommend the removal from the approved list of the Association of any school which, after a year's warning, continues to violate the same Regulation or Criterion which was violated the previous year. Upon the recommendation of the State Committee, however, this policy may be waived by a three-fourths vote of the Commission members present.

State Committees are encouraged to advise a school which has been warned for violation of a Regulation or a Criterion to submit to an evaluation, using the *Evaluative Criteria*.¹ This evaluation is to be carried out when, in the opinion of the State Committee, it will assist in improving the condition for which the school was warned, or in explaining the extenuating circumstances which may justify a second warning, or even the discontinuance of the warning.

¹ Write for the *Evaluative Criteria* to: Cooperative Study of Secondary School Standards, 1785 Massachusetts Avenue, Washington 6, D.C.

POLICY III

Secondary schools are approved for an indefinite period. All schools on the approved list, however, shall submit such reports as the Commission may require. The certificate showing that a school is approved by the Association is valid as long as the school meets the conditions for approval as defined by the commission on Secondary Schools and approved by the Association.

POLICY IV

Credits acquired through summer session work, extension courses, correspondence courses, or state examinations will be accepted by the Association as counting toward the preparation of the teacher, if such credits are accepted by an approved institution of higher education.

The Association recognizes that credit established in accordance with the recommendations in *A Guide to the Evaluation of Educational Experiences in the Armed Services*² is sound. Such credit may be counted as a part of the preparation of the teacher, when accepted by an approved institution of higher education.

POLICY V

The Chairman of the State Committee is the official agent of communication between the approved schools of the state and the Secretary of the Commission on Secondary Schools. He is responsible to the Commission for the distribution, collection, and filing of all reports, and for such other duties as the Association may direct.

The Chairman of the State Committee shall be either the Committee representative of the State University or of the State Department of Education and shall be selected by majority vote of the State Committee subject to the approval of the Executive Committee.

² For *Earning Secondary-School Credit in The Armed Forces*, write to the National Association of Secondary-School Principals, National Education Association, 1201 Sixteenth Street, N.W., Washington 6, D.C.

He shall be elected for a term of four years, and shall be eligible to succeed himself, but may continue in office only so long as he is a member of the State Committee.

In the event of a vacancy in the chairmanship during the term of office of an incumbent, the State Committee shall elect a chairman to complete the unexpired term. The meeting for this purpose will be called by the secondary school representative having the longest tenure on the committee.

POLICY VI

The interim authority for interpreting Policies, Regulations, and Criteria for the Approval of Secondary Schools is the Secretary of the Commission on Secondary Schools.

POLICY VII

It is the policy of the Association to warn high schools for violation of the conditions for eligibility to the approved list of the Association and to drop from this list any high school which violates the same Regulation or Criterion during consecutive years. High schools may also be warned or dropped whenever it becomes evident that they frequently violate conditions for eligibility to the approved list. In the case of a minor violation, the Association may instruct the State Committee to advise the school concerned. It is the policy of the Association not to take an action which is different from that recommended by the State Committee without first notifying the committee of the state concerned.

State Committees are encouraged to advise a school which has been warned for violation of a Regulation or a Criterion to submit to an evaluation, using the *Evaluative Criteria*. (See Policy II.)

POLICY VIII

In the case of individual schools of any state, reasonable deviations from Regulations and Criteria may be ac-

cepted by the Commission and approved by the Association when recommended by the State Committee. Such recommendations must be supported by substantial evidence showing that these deviations are justifiable.

No school should be denied approval if it fails to meet fully all Criteria and Regulations, provided its total educational pattern is good, as revealed by the results of a competent survey or other evidence. Policy VIII also applies to new schools seeking admission. State Committees are justified in expecting closer adherence to published regulations and criteria in the case of new schools. Special attention should be given to the reports of State Committees which have used the *Evaluative Criteria* as one of the steps to be taken by new schools in making their application for admission. It is recommended that State Committees ask each prospective new school to carry out at least a self evaluation using the *Evaluative Criteria*. Such schools should be encouraged to use the full Cooperative Study procedure, supplemented by a review of the self evaluation by a visiting committee or by the State Committee.

The conditions for eligibility to the approved list of member schools of the Association are included under two separate classifications: Regulations and Criteria.

REGULATIONS

Regulations are those yardsticks which serve to assist schools which are members of the Association with definite guidance as to the necessary minima to be observed. In other words, regulations are floors below which there seems to be agreement that schools may not fall and still be of the type that should be considered good schools according to the Association's Criteria.

REGULATION I

The Annual Report Blank

The Association is under no obligation to consider a school for unqualified approval unless the annual report blanks have been properly and completely filled out and placed on file with the State Chairman on the dates determined by the Commission.

REGULATION II

Organization of the School

A secondary school shall base its report on all grades included in its organization.¹

REGULATION III

*Qualifications of Staff Members²**A. Instructional Staff*

1. *General Preparation.* a. All members of the instructional staff possess a Bachelor's degree from an institution of higher education approved by the North Central Association of Colleges and Secondary Schools or from an institution of equal standing. (Exceptions may be made when recommended by the State Committee in the case of teachers of trades, if these teachers are legally qualified to teach in the state and have had the apprenticeship training required in their respective trades.)

b. Graduates of colleges not recognized by the North Central Association or by any other regional accrediting agency may become eligible to teach in a secondary school accredited by the Association by being admitted to graduate standing in an institution of higher education accredited by the Association or by any other regional accrediting agency, and by completing successfully not less than six semester hours of graduate work. This part of the Regulation is not to apply to graduates of non-accredited colleges who desire to teach in the state in which they were graduated, when approved individually in accordance with the policy of the State Committee.

¹ A change in reporting the organization of a school shall be approved by the State Committee.

² Except where specifically stated (as in the case of library personnel), requirements pertaining to staff preparation are not retroactive and do not invalidate the qualification of a staff member who was fully qualified under the standards applicable at the time of his appointment to his present position.

c. Teachers in school systems having two or more high schools, who are transferred by the administrative officer from one school to another, and who, though not fully qualified, have been accepted previously by the Association, when they teach the same subjects in a new school as they were teaching in their former position, shall be accepted by the Association as properly qualified teachers, provided that the system encourages teachers who are not fully qualified to continue their educational preparation, and that evidence exists that progress is being made.³

2. *Professional Preparation.* The minimum professional preparation of individual members of the instructional staff is fifteen semester hours of education. In the case of a teacher whose professional preparation consists of less than fifteen semester hours, the State Committee shall have power to waive this Regulation if, in its judgment, the teacher is otherwise highly qualified and is doing clearly superior work.

3. *Preparation in Teaching Areas.* a. Adequate preparation in teaching fields and areas is defined as that which meets the legal requirements of the state in which the school is located and also any special requirements set up by legally constituted educational authorities of the state, provided, however, that the minimum preparation is fifteen semester hours at the college level in any one of the following areas: language arts, a foreign language, social studies, science, mathematics, business, health and physical education, music, art, home economics, agriculture, and industrial arts, and adequate preparation in each subject taught.⁴ In the

³ In the case of church schools, "school system" is taken to mean a group of schools under the central administrative control of a particular religious order or diocesan superintendent.

⁴ Deductions in mathematics or in any one foreign language may be allowed to the extent

case of a teacher who devotes a minor fraction of his time to the teaching of a particular subject, a reasonable deviation from the minimum preparation may be accepted when approved by the State Committee.

b. In the case of unified courses which draw their subject matter from two or more teaching fields, the minimum preparation expected will be twenty semester hours on the college level, appropriately distributed among the teaching fields concerned.

c. Each State Committee will submit to the Secretary of the Commission on Secondary Schools the requirements of the properly constituted educational authorities of the state pertaining to the preparation of teachers in subject fields and areas.

4. *Records of Teachers' Preparation.* An official transcript or a certified copy of the college preparation of each teacher is kept on file in the office of the administrative head of the school or school system. All information which pertains to the preparation of teachers is secured from such official records. An official transcript is the institutional credit record signed by the registering officer of the higher institution certifying the credits. Its submission to the State Chairman for evaluation may be required. A certified copy of the transcript may be accepted.

B. *Library Staff*¹

1. *The Librarian.* a. In schools with an enrollment of 500 or more pupils, the librarian is a full-time librarian. In schools with an enrollment of 200-499 pupils, the librarian may be a full-time librarian, a study-hall librarian, or a teacher-librarian; at least half the time

of a teacher-librarian is devoted to the library. In schools with an enrollment of less than 200 pupils, at least two periods a day of the teacher-librarian's time are devoted to the library.

b. The librarian meets the requirements of Regulation IIIA-1 and 2. In a school with an enrollment of 500 or more pupils, the librarian has completed a minimum of 24 semester hours of library science. In a school with an enrollment of 200-499 pupils, the librarian has completed a minimum of 15 semester hours of library science. In a school with an enrollment of less than 200 pupils, the librarian has completed a minimum of 6 semester hours in library science.

c. The work in library science includes such courses as the following: school library organization and administration, cataloguing and classification, book selection and acquisition with emphasis on the reading and needs of adolescents, reference material, and general bibliography.

2. *Assistants.* Provision is made for an adequate number of assistants to the librarian, either as assistant-librarians or as pupil-librarians.

C. *Other Professional Staff* (physician, dentist, nurse, psychiatrist, psychologist)

Members of the non-instructional professional staff meet the requirements of the state in which the school is located.

D. *Clerical Staff*

Adequate clerical assistance is provided. The qualifications of such personnel include, as a minimum, high school graduation and preparation in office practice.

E. *Custodial Staff*

The members of the custodial staff meet the state requirements pertaining to their training and employment.

of two semester hours for each unit earned in high school, not to exceed a total deduction of six semester hours.

¹ Regulation IIIB shall be in force upon adoption, but exceptions may be made by the State Committee until the school year 1955-56.

REGULATION IV

*Administrative Staff**A. Principal*

The principal (or the administrative head of the secondary school) has had at least two years of teaching experience and possesses as a minimum a Master's degree from an institution of higher education qualified to offer graduate work. His preparation in school administration and supervision includes an appropriate distribution of graduate work covering those phases of the school administrator's work which are professional in character, such as secondary school administration, curriculum making, the supervision of instruction, methods of teaching, philosophy of education, history of education, pupil activities, guidance, health and safety, vocational education, personnel records and reports, and school finance. Anyone holding title of principal meets the foregoing requirements.

B. Superintendent

The superintendent of schools or the administrative head of the school system has the teaching experience and professional preparation described in Regulation IVA.

C. Supervisory and Guidance Assistants

Any member of the faculty who assists the administrative head of the school in the supervision of instruction possesses, as a minimum, the requirements specified in Regulation IIIA-1 and 2, and, in addition, an appropriate distribution of graduate work in such fields as the supervision of instruction in the secondary school, personnel and guidance, methods of teaching, educational psychology, and philosophy of education.

REGULATION V

Length of School Year

The minimum length of the school

year is thirty-six weeks, 180 days, with a minimum of 172 days of classes actually in session.

REGULATION VI

Length of Class Period

A. A school may elect to conduct classes on the short period basis, the long period basis, or a combination of the two. The minimum length of the short class period for one unit of credit is defined as 40 minutes, exclusive of all time used in the changing of classes or teachers, five times a week for thirty-six weeks, or 180 days. Under this plan, two class periods necessitating little or no preparation outside of class are considered as equivalent to one period of prepared class work.

B. The length of the laboratory or long class period, for one unit of credit and for the purposes of this Regulation, is defined as a minimum of 55 minutes exclusive of all time used for the changing of classes or teachers. Under the long period plan, directed study may be substituted for the outside preparation required for the short period class. Under the short or the long period plan, however, a reasonable amount of outside or independent study by pupils in accordance with their abilities is encouraged.

REGULATION VII

Requirements for Graduation

A. A three-year senior high school requires a minimum of twelve units, or 120 semester hours, for graduation. Four-year senior high schools require a minimum of sixteen units, or 160 semester hours, for graduation. Six-year high schools require a minimum of twelve units, or 120 semester hours, earned in the upper three years. (See Regulation II).

B. A semester hour is defined as the

amount of credit granted for the completion of a course covering one semester and consisting of one class period weekly, as defined in Regulation VI.

C. In order to permit variation from the foregoing definitions of a quantitative unit of credit based upon time element and to stimulate improved standards of scholarship, the school may elect to grant credit on a qualitative basis. School authorities, therefore, are encouraged to determine credit through the use of approved end-of-course tests. These tests measure the achievement ordinarily required for credit in a one or two semester course. Any supplementary evidence which may be considered necessary or desirable to establish the validity of such credit may be required.

D. State Committees are empowered to approve this plan for those schools wishing to adopt it, provided the school has personnel trained for the administration of such testing program. The scores of such tests may be used for the transfer of credit to other schools and to colleges.

E. Tests may be used to classify individuals entering school with educational experience for which regular transcripts of credit are not available. Each individual thus tested is placed in the educational courses best suited to his needs.

REGULATION VIII

Size of School

An approved school employs, as a minimum, a number of teachers whose full-time equivalency is one in excess of the number of years in the organization of the school.

REGULATION IX

Pupil Load

In order to protect the social as well as the intellectual maturity of the pupil, it is advisable that he have four

years experience in a four-year high school or three years experience in a three-year high school in order to graduate.¹ In exceptional cases, pupils may be allowed to graduate in less than the time specified above, provided that adequate guidance procedures have been followed.

REGULATION X

Teaching Load

In determining the teaching load, consideration is given to the following components: the number of periods of class teaching, the number of different preparations, study hall duty, class size, total number of pupils taught daily, the demands made in the way of any guidance and supervisory activities, and the duties involved in the sponsorship of pupil activities. Due allowance is made in computing the teacher load for special assignments to committee work whose purpose is to improve any phase of the school program. The desirable maximum equivalency of a combination of such duties is six periods daily for the short period schedule, and five periods daily for the lengthened period schedule. A teaching load in excess of seven periods daily, including study hall assignments, for the short period schedule and six periods daily, including study hall assignments, for the lengthened period schedule is considered a violation of this Regulation. The total teaching load is not excessive and is distributed equitably among the teaching staff.²

¹ If the school has a summer session, the time spent may be counted as a proportionate part of the school year.

² An average enrollment in the school in excess of thirty pupils per teacher is considered as a violation of this Regulation. For the purpose of interpreting this Regulation, the principal, vice-principals, study hall teachers, vocational advisers, librarians, and other supervisory officers may be counted as teachers for such portion of their time as they devote to the management of the high school.

REGULATION XI

Library Expenditures

A. That part of the annual secondary school budget devoted to library expenditures varies according to the size of the school; the smaller the school, the greater the pupil per capita expenditure. A minimum amount of \$200.00 is expended annually in each secondary school for the purchase of library books, periodicals, newspapers, pamphlets, vertical file materials, and supplies.

B. The budget is planned in accordance with the library needs as shown by the annual library inventory and in accordance with the school's objectives for library service. The following scale of annual expenditures is recommended as a guide:

1. Schools with an enrollment of 1000 or more pupils expend approximately 50 cents per pupil.

2. Schools with an enrollment of 500 to 999 pupils expend approximately 75 cents per pupil.

3. Schools with an enrollment of 200 to 499 pupils expend approximately \$1.00 per pupil.

4. Schools with an enrollment of less than 200 pupils expend not less than \$200.00.

REGULATION XII

Financial Support

The financial condition of the school district or governing body is such that it is possible for the school to meet the conditions for accreditation and to maintain reasonably well standards of excellence as indicated in the Criteria.

CRITERIA

The standards of excellence which a school holding membership in the North Central Association is expected to maintain are based on statements in the *Evaluative Criteria*, as developed

by the Cooperative Study of Secondary School Standards.

CRITERION I

*Philosophy and Objectives**A. Pupil Population and School Community*

Since the school exists for the educational needs of its constituency, it should be familiar with the distinctive characteristics of the community, such as its sociological composition, its social, economic, religious, recreational and educational institutions and agencies, and the educational needs of both youth and adults. Since the local community is also a part of the state, nation, and world, the school must also be concerned with an understanding of the social, political, economic, and other forces of these larger communities and with the development of the ability of all peoples to live together in one world. A school, therefore, should develop its philosophy and objectives from an analysis of such social factors.

B. Philosophy of the School

Each school should be free to determine its philosophy to the extent that it promotes the principles and spirit of American democracy. The statement of philosophy should be written, implemented by a specific statement of objectives, and manifested in the educational program of the school.

CRITERION II

*Educational Program**A. Basic Principles*

1. The educational program of the school is concerned with more than the accumulation of knowledge, development of skills, and improvement of understandings. The development of interest, tastes, appreciations, ideals, and attitudes, and the functioning of all

these elements in a democratic society should be included in the educational program.

2. An educational program which is concerned only with preparation for college can no longer be considered an adequate offering for a school, although preparation for college should continue to be one function of secondary education. The program should provide for the interests, needs, and abilities of all pupils as well as for the requirements of the community and the public supporting the school.

3. The evaluation of an educational program should be made in terms of the curriculum and courses of study, pupil activities, the library, guidance, instruction, and outcomes.

B. Curriculum

1. The curriculum should be chiefly concerned with the orientation, guidance, instruction, and participation of youth in those significant areas of living for which education should supplement the work of other social institutions.

2. Constant adaptation and development of the curriculum should be a cooperative enterprise engaging all staff members, carried on under competent leadership, and using all available resources. Carefully conducted and supervised experimentation for curriculum development is desirable.

C. Pupil Activity Program

The pupil activity program should aim to develop desirable social traits and behavior patterns in an environment favorable to their growth. Special importance should be attached to provision for pupil participation through student councils or similar organizations in the administration of those school functions which especially concern the interest and welfare of pupils.

The activity program should not only provide opportunity for developing leadership ability but should stimulate active participation of all pupils in appropriate school organizations and community activities.

D. Library Service

1. The library is easily accessible to pupils, adequate in size, and attractive in appearance.

2. Adequate provisions for the school library should include the following: a. A well-educated, efficient librarian; b. books and periodicals to supply the needs for reference, research, and cultural and inspirational reading; c. provision for keeping all materials fully catalogued and well organized; d. a budget which provides adequately for the maintenance and improvement of the library; e. encouragement of pupils in the development of the habit of reading and enjoying books and periodicals of good quality and real value; f. continuous and systematic use of the library by teachers.

E. Guidance Service

Guidance, as applied to the secondary school, should be thought of as a service designed to give systematic aid to pupils in making adjustments to various types of problems which they must meet—*educational, vocational, health, moral, social, civic and personal*. Guidance activities should be organized into a definite program in which each staff member is a responsible participant. Where counselors are available, they should be responsible not only for specific activities but for stimulating and assisting teachers in their guidance activities.

F. Instruction

1. In the instructional program evidence should be found of: a. goals or objectives appropriate to the degree of

development of pupils and in keeping with the purposes of the school; b. the selection and use of varied types of teaching and learning materials and experiences; c. the adjustment of method and organization to conditions and needs of pupils as a group and as individuals; d. the use of every legitimate means available in the evaluation of progress and quality of learning; e. a personal relationship of confidence, respect, and helpfulness between teachers and pupils, resulting in similar relationships between school and community; f. provision for all desirable types of learnings; g. definite and adequate learning by pupils as an outcome.

2. The efficiency of instruction, the acquired habits of thought and study, the general intellectual and moral tone of a school, and the cooperative attitude of the community are paramount factors. Only schools that rank well in these particulars are considered eligible for the list of schools approved by the Association.

G. *Evaluation of Outcomes*

1. In the educational program of a good secondary school, major concern should be given to attaining desirable outcomes and to the various kinds of evidence indicating that such outcomes are being realized.

2. The results of the learning process should include: a. factual information or knowledge; b. meaning and understanding; c. abilities to do—knowledge and understanding combined with skill; d. desirable attitudes—scientific, social, moral, and others; e. worthy ideals, purposes, appreciations, and interests; and f. resultant intelligent participation in general life activities.

CRITERION III

School Staff

A. *Instructional Staff*

1. The staff should be a group of individually competent persons, or-

ganized into a cooperative body, having common purposes and motivated by the philosophy and objectives of the school. Diversity of preparation and viewpoints is desirable for a well-rounded staff, but its members should have the ability and the desire to work together, cheerfully, harmoniously, and efficiently for the good of the school and its pupils. Each member of such a staff should give evidence of awareness and understanding of educational problems and of *continuous professional growth*.

2. The number of staff members should be adequate for the curriculum offered, the school's enrollment, and the special needs of the pupils and the community. The teaching load and the total working load should be such as not to endanger the special needs of pupils.

3. Each staff member should have broad, general scholarship, thorough preparation in his special field, professional competence, and reasonable social development. In the selection of individual staff members, attention should be given to teaching ability, personality, health, and character. In evaluating the adequacy of the general preparation of the instructional staff, State Committees will take into consideration the extent to which the staff as a whole has completed work beyond the Bachelor's degree, the kind and distribution of college courses taken, the recency of their completion, and other evidences of professional growth.

4. Teachers should receive salaries adequate to insure a living standard comparable with the social demands on the profession and the worth of their service, as well as to provide security for old age.

B. *Librarian*

The library staff has a broad, general education, a good understanding of the school's philosophy of education and of

its educational program, and some successful teaching experience. The staff has the ability to work effectively with teachers in finding and using suitable library materials and aids in teaching and learning, to work agreeably and effectively with pupils, and to teach them to find and use library material readily and effectively.

C. *Other Professional Staff*

The services of such personnel as physician, dentist, nurse, psychiatrist, psychologist, speech correctionist and hearing therapist are desirable and should be adequate to the needs of the school.

D. *Clerical Staff*

The clerical assistance necessary for an effective program of instruction, administration, and supervision should be provided.

E. *Custodial Staff*

The number of custodial staff members should be adequate to keep the school plant in sanitary and efficient operation. They should be trustworthy, resourceful, and cooperative.

F. *Health Examination*

It is recommended that a health examination be given to every new employee and periodically to every staff employee.

CRITERION IV

Administration and Supervision¹

A. *The Board of Education*

Responsibility for determining the general policies of the school system is entrusted to a governing board, hereafter designated as the board of education.

¹ In the case of private schools or church schools, by "Board of Education" is to be understood the individual or group performing the functions of the board of education which are considered in Criterion IV.

tion. The board functions only when in official session; at other times its members have no authority in school matters, except as specifically authorized by the board. The administrative head of the schools is the chief executive officer of the board of education. Subject to the approval of the board of education, the administrative head is responsible for the selection and assignment of all school employees, the business management of the schools including school plant and equipment, the administration and supervision of the educational program, and the program of public relations. These duties necessitate organization of resources, both material and personal; delegation of duties and authority; and supervision of all delegated tasks and of all individuals to whom authority and responsibility are assigned. The better the administrative personnel, the more efficient will be the organization and management and the greater the probability of the successful attainment of the school's objectives, provided the personnel is always mindful of the primary function of the school—the development of its pupils. Success should be measured in terms of results, not of machinery.

B. *Policies of the Board of Education*

1. The policies of the board of education are such as to encourage a maximum of educational growth and development. The board of education has a published statement of policy.

2. The policies of the board of education are such as to attract and retain the services of well-qualified and competent staff members and a well-trained school administrator who is capable of providing effective educational leadership. It is the policy of the board under which an accredited high school operates to employ, promote, demote, and discharge staff members and other employees only

upon the recommendation of the administrative head of the school system.

3. No employee is dismissed during the term of a contract or refused re-employment except at an official meeting of the board of education. The minutes of such a meeting clearly indicate all actions taken by the board. Employees who are to be dismissed or refused reemployment are given reasons for the action taken by the board of education and are given an opportunity for a hearing before official action is taken.

4. The administrative head of the school system attends all meetings of the board of education except that part of a meeting when his own employment is under consideration.

5. The board of education deals with staff members and other school employees only through the administrative head of the school system.

6. The administrative head of the school system is held responsible for the board of education for submitting a carefully planned budget and for the expenditure of money in accordance with the budget adopted. He keeps those members of the staff who have responsibility for the proper expenditure of school funds informed as to the balances remaining in that part of the budget which relates to their departments.

7. The administrative head of the school system should share with the controlling board responsibility for establishing and maintaining desirable relations with the school's public. Therefore the supporting public should be informed regarding the policies, program, objectives, activities, and plans for the future of the school so that the support of the public be assured for the school's undertakings. There should always be a sympathetic and understanding relationship between the school and its administra-

tion on the one hand and its public on the other.

C. Cooperative Relationships

The working relationships between the board of education and the administrative head of the system, between the administrative head of the system and the principal of the secondary school, and between principal and staff are such as to insure successful and effective administration. Administrative procedures should be carried on by democratic processes which recognize the abilities and contributions of staff members.

D. Administration

1. The administration of the school is such as to insure a well-organized and well-managed school, effectively and intelligently supervised, and meeting the needs and interests of the pupils and of the community. Effectiveness of organization, permanency of tenure of all staff members, as shown by the history of the school, and the attitude and support of the community are matters which will be taken into consideration in determining whether the school is eligible for accrediting.

2. Interference with the administration of the high school by individuals or organized groups either inside or outside the school, when such interference is likely to result in a lowering of the effectiveness of the educational program, will be considered sufficient grounds for an official visit and inquiry into the condition of the school.

E. Supervision

Supervision includes the improvement of every phase of the educational program, such as the organization of programs of studies, the revision of curricula, the instructional procedures, the pupil activity program, and the non-instructional activities of staff mem-

bers. The administrator directly in charge of a secondary school should have ample time during the school day for the administration and supervision of his school.

F. Administration of the Activity Program

A secondary school should not participate in any district, state, interstate, or regional athletic, music, commercial, speech, or other contest, tournament, congress, or assemblage involving the participation of more than two schools, except those approved by the State Committee, or by that organization recognized by the State Committee as constituting the highest authority for the regulation and control of such activities. It should be the responsibility of the State Committee to furnish member schools with a list of approved contests, tournaments, congresses, and assemblages. The State Committee should give prompt action on requests for the approval of activities.

G. System of Records and Reports

A school should maintain a type of personnel and record system of such nature that it can provide any of the data asked for in the Criteria.

CRITERION V

School Plant, Equipment and Supplies

A. Building and Site

The school plant should be flexible, adequate in size, and so planned as to facilitate the offering of a modern program of secondary education that is suited to the needs and interests of the pupils and of the community. When a new plant is being planned, or an existing building is to be enlarged or remodeled, plans should contemplate meeting future as well as present needs. The building should be attractive and

appropriate in design and should assure the safety and health of its occupants. The site should be large enough to provide ample playground space and should be attractively landscaped.

B. Sanitation

Janitorial service, lighting, heating, ventilation, water supply and drinking fountains, lavatories and toilets, wardrobes and lockers, school furniture, and location of the classrooms, shops, laboratory, and library should be such as to insure hygienic conditions for pupils and teachers.

C. Safety

Proper steps for protecting pupils against injuries should be taken in laboratories, shops, gymnasiums, transportation facilities, and in all parts of the building or grounds where accidents are likely to occur. The school plant should be adequately protected against fire and should have fire exits.

D. Instructional Equipment and Supplies

Instructional equipment and supplies, such as: science apparatus, laboratory tables and demonstration desks; shop tools and machinery; gymnasium equipment and supplies; equipment for home economics and agricultural laboratories; equipment and supplies for commercial, art, and music rooms; audio-visual aids equipment; maps and charts; library books, text books, and supplies should be adequate and used in such a way as to meet the needs of instruction for all courses and activities offered.

E. Library

1. *Materials.* The library should be conceived of as a communications center. The number and kind of library and reference books, periodicals, newspapers, pamphlets, information files,

audio-visual materials, and other learning aids should be adequate¹ for the number of pupils and the needs of instruction in all courses offered.

2. *Location and Equipment.* a. The library room, or combination library-study hall, should be easily accessible, should accommodate approximately ten percent of the enrollment, should be attractive in appearance, and should contain standard library equipment, such as: reading tables, desks or desk-chairs, chairs, librarian's desk, cabinets for card catalogs, magazine and newspaper racks, dictionary stands, and filing cabinets. In judging the adequacy of library space, consideration should be given to modifying factors in individual schools and to the extent to which library facilities are decentralized.

b. The record system should include a shelf list, alphabetically arranged card catalogs, an accession record, and should be classified by the Dewey Decimal system or other classification

¹ Quality of service and adequacy may be measured by the use of Section F, Library Services of the *Evaluative Criteria*.

system acceptable to the State Committee. The central library may be supplemented by departmental or classroom libraries of frequently changed materials appropriate to the work of individual classes.

F. *Special Services*

Adequate provision should be made according to the individual needs of each school for such special services as rest rooms, cafeteria, dining rooms, kitchens, clinics, infirmary facilities, and study and sleeping quarters.

G. *Protection of Pupil Records; Care and Storage of Equipment and Supplies*

Ample provision should be made for the safekeeping, systematic arrangement, and care of all materials, supplies, and apparatus used in the instructional and activity program, and the storage of all financial and personnel records and reports. An annual inventory is made of all equipment and supplies. A fireproof vault should be provided, or a safe which meets underwriters' specifications.

Trends in Secondary Schools

SUMMARY OF STATISTICAL INFORMATION FOR SECONDARY SCHOOLS ACCREDITED BY THE ASSOCIATION FOR THE SCHOOL YEAR 1954-55

DATA PRESENTED in the tables which follow are compiled from the Annual Report on Regulations (Form A) as submitted by member schools and summarized for the several states. They indicate trends in the more significant items included in that report. For each item returns are given for the nineteen states, the Dependents' Schools, and the Association as a whole. For comparison, the totals for the preceding five years are presented at the bottom of each table, except in a few instances where comparable figures are not available. The data have been compiled for schools in four categories of size—fewer than 200 pupils; 200-499; 500-999; and more than 1,000. Due to limited space, these separate tabulations are not included in this published report. Only the totals for all categories are shown.

In 1954 the number of member schools accredited by the Association rose to 3,268, an increase of fifty-eight over the previous year. Thirty were "Dependents' Schools" maintained by the Armed Services for the dependents of military and civilian personnel in occupied countries. It will be noted that the four-year high schools showed the largest numerical increase. In 1953-54 there were 1,853 schools of this type and in 1954-55 there were 1,911, an increase of fifty-eight. The six-year high schools gained three; the three-year schools increased by twenty; and schools organized on other plans, for the most part two-year and

five-year schools, showed a loss of twenty-three. All told, the net gain was sixty-eight schools.

The pupil enrollment increased by 74,744 to a total of 1,749,711. This is the largest number ever reported. When enrollment in the separate grades is examined, we find an increase in each grade from seven through twelve. The average continued to climb. The figure was 535, a gain of 13 over 1954.

The number of pupils graduated in 1954 (the report for 1954-55 shows the graduates for the previous year) was 333,011, an increase of 7,498. The number of post-graduates increased by 586 over the previous year.

It appears that there has been steady, if gradual, progress in the upgrading of library personnel. The number of librarians with no library training increased from 325 to 328. Those with from 1 to 5 semester hours of training decreased from 259 to 216, a decline of forty-three, and those with from 6 to 15 semester hours in library science decreased from 901 to 887, a loss of fourteen. However, the number of librarians with from 16 to 23 semester hours of training increased from 542 to 590, a rise of forty-eight, and those with 24 semester hours or more rose from 1,517 to 1,753, an increase of 236. Thus it seems that we have fewer librarians with little or no training and more librarians with sufficient training. The number of full-time librarians increased by 141 over the preceding

year. We now have 2,343 in a total of 3,810 librarians, who might be said to be sufficiently well trained to qualify. On the other hand, we still have 328 individuals acting as librarians with no training at all and 1,103 with insufficient training to insure effective service.

Salaries of teachers continued to increase. The number receiving less than \$3,200 per year decreased from 10,064 to 7,309. At the same time the number receiving \$6,000 or more increased from 2,203 to 7,064. The number of high school principals receiving salaries of \$6,000 or above, increased from 877 to 1,023. At the same time the superintendents receiving salaries of \$6,000 or higher, increased from 400 to 1,152.

The teaching load, as reflected in the pupil-teacher ratio, remains relatively constant. In 1955 only 26 schools of the 3,268 reporting showed a pupil teacher ratio of more than 30. Violations of the regulation pertaining to pupil-teacher ratio were found in nine of the 19 states.

The teacher shortage is reflected in the data on new teachers. The number without a bachelor's degree continues negligible, but increased from 230 to 246. The number short in professional training rose from 286 to 299, and the number with inadequate preparation in their respective teaching fields decreased from 469 to 429. All told, 13,820 did not return to the positions which they held the previous year.

Summary of the 1954-55 annual reports of all secondary schools

| States | Number of Schools | | School Organization | | | | | Enrollments from Grade 7 through Post-Graduate Work, Inclusive | | | | | | | | | | | |
|---------------------|----------------------|-----|---------------------|------|-------|-------|------|--|--------|--------|---------|--------|--------|---------|---------|---------|----------|---------|---------|
| | Public Private Total | | Years Included | | | | | Grade 7 | | | Grade 8 | | | Grade 9 | | | Grade 10 | | |
| | | | Six | Four | Three | Other | Boys | Girls | Total | Boys | Girls | Total | Boys | Girls | Total | Boys | Girls | Total | |
| 1. Arizona | 49 | 0 | 49 | 4 | 41 | 3 | 1 | 186 | 188 | 374 | 171 | 187 | 358 | 5,060 | 4,872 | 9,932 | 4,621 | 4,735 | 9,356 |

The Constitution of the Association¹

ARTICLE I. NAME

The name of this Association shall be the North Central Association of Colleges and Secondary Schools.

ARTICLE II. OBJECT

The object of the Association shall be the development and maintenance of high standards of excellence for universities, colleges, and secondary schools, the continued improvement of the educational program and the effectiveness of instruction on secondary and college levels through a scientific and professional approach to the solution of educational problems, the establishment of cooperative relationships between the secondary schools and colleges and universities within the territory of the Association, and the maintenance of effective working relationships with other educational organizations and accrediting agencies.

ARTICLE III. TERRITORY AND MEMBERSHIP

Section 1. The territory of the Association shall consist of the states of Arizona, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, West Virginia, Wisconsin, and Wyoming and/or such areas as may be hereafter included. Territory shall be excluded from or included within the jurisdiction of the Association only upon the recommendation of the Executive Committee and by the vote of the Association. The recommendation of the Executive Committee shall be based on substan-

tial evidence indicating that the action recommended represents the desire of the universities, colleges, and secondary schools of the territory concerned.

Section. 2. The membership of the Association shall consist of three classes: (1) universities, colleges, and secondary schools; (2) officers of the Association and members of the Commissions; and (3) honorary members. Only members of Class 1 are eligible to vote at official meetings of the Association.

It shall be understood that membership in the Association for universities, colleges, and secondary schools is purely voluntary. Although all decisions of the Association bearing on the policy and management of universities, colleges, and secondary schools are advisory in character, it shall be understood that the Association has the right to establish requirements for membership, to develop and establish criteria for the evaluation of universities, colleges, and secondary schools, and to establish and maintain all regulations and conditions for continued membership in the Association.

Section 3. Any university, college, or secondary school which has been approved by the Association shall be admitted to membership on the payment of the annual dues. Such membership shall cease if at any time the university, college, or secondary school resigns or is dropped from the approved list of the Association or if the annual dues are more than one year in arrears. Any lapse in membership shall date from July 1 next succeeding the Annual Meeting at which time action was taken to drop the member university, college, or secondary school in question.

Section 4. All individuals holding

¹ As amended at the 1955 Annual Meeting of the Association.

membership on commissions of the Association or serving as elected officers of the Association shall thereby become members of the Association.

Section 5. Honorary members shall be nominated by the Executive Committee and elected by the Association by a two-thirds vote of all members present and voting at any session of the Association held during the Annual Meeting. Such individuals are honorary members of the Association and not honorary members of any particular commission.

Section 6. Honorary members shall receive the NORTH CENTRAL ASSOCIATION QUARTERLY and shall have all the privileges of membership in the Association except voting.

Section 7. Honorary members, officers of the Association, and members of the commissions shall not be required to pay dues as hereinafter defined.

Section 8. Members of the Association, honorary members, individuals officially connected with a university, college, or secondary school which holds membership in the Association, and individuals who are officially connected with the state department of public instruction of a state which is included in the territory of the Association shall have the right to attend the meetings and to participate in the activities of the Association and of the various commissions. It shall be understood, however, that attendance at such meetings and participation therein shall be in accordance with the provisions of this constitution and also with the policies adopted by the various commissions and by the Executive Committee.

ARTICLE IV. OFFICERS, COMMISSIONS, AND COMMITTEES

Section 1. The officers of the Association shall be a president, a vice presi-

dent, a secretary, and a treasurer. The president and vice president shall be elected at the Annual Meeting of the Association for a single term of one year or until their successors are elected. The secretary and the treasurer shall be appointed by the Executive Committee. Their terms of office shall be determined by the Executive Committee.

All officers of the Association and of the commissions shall be officially and actively connected with a university, college, or secondary school which holds membership in the Association or with the state department of education of a state in the territory of the Association as defined in Article III, Section 1.

Section 2. There shall be an Executive Committee, a Commission on Colleges and Universities, a Commission on Secondary Schools, and a Commission on Research and Service, and these shall be constituted as hereinafter defined.

The Executive Committee and the various commissions of the Association shall, within the limitations imposed by the constitution of the Association, have the right to determine their own procedures and to establish rules and regulations for governing such procedures.

Section 3. The Executive Committee. The Executive Committee of the North Central Association of Colleges and Secondary Schools shall consist of the president, the vice president, the president of the Association during the preceding year, the treasurer, the editor of THE QUARTERLY, the chairman and the secretary of each of the commissions provided for in Article IV, Section 2, and four additional members, one of whom shall be elected each year for a term of four years. Qualifications for membership on the Executive Committee shall be the same as prescribed

for officers of the Association in Article IV, Section 1.

The Executive Committee shall receive from the Commission on Colleges and Universities the list of colleges and universities recommended for membership in the Association, shall receive from the Commission on Secondary Schools the list of secondary schools recommended for membership in the Association, and shall submit them to the Association for final approval. It shall publish in the official organ of the Association, the NORTH CENTRAL ASSOCIATION QUARTERLY, the lists of universities, colleges, and secondary schools approved by the Association.

The Executive Committee shall have final authority to hear appeals from the decisions of the commissions, relative to the approval of universities, colleges and secondary schools and to determine the action to be taken upon such appeals.

The Executive Committee shall be under no obligation to a member university, college, or secondary school to consider any appeal from the decision or action taken by a commission unless such appeal is filed with the Executive Committee within thirty days following the Annual Meeting. Before taking final action on an appeal, the Executive Committee shall request the officers of the commission concerned to make a recommendation and to submit therewith all facts pertinent to the case.

The Executive Committee shall submit to the Association for election those persons nominated by the respective commissions for membership therein in accordance with the provisions of the constitution.

The Executive Committee shall determine the time and place of the Annual Meeting of the Association, prepare the programs for the meetings of the Association, approve all programs for the meetings of the various com-

missions, provide for the publication of reports and proceedings, and transact any necessary business. The Executive Committee shall also fill all interim vacancies in the offices of the Association, and upon recommendation of the commissions concerned shall fill interim vacancies in the membership of the various commissions.

It shall be the duty and responsibility of the Executive Committee to coordinate and publicize the work of the various commissions in such ways as to further most effectively the object of the Association.

The Executive Committee shall have the power to authorize and approve all expenditures of funds and to require each commission to submit it to a budget. The proposed budget submitted by each commission to the Executive Committee for approval shall be a complete forecast embracing (1) the program of activities, (2) the estimated receipts together with their sources, and (3) the estimated expenditure necessary to carry out the work of the commission. It shall be the duty and responsibility of the Executive Committee to approve or disapprove in advance of any commitments the proposed program of activities of each commission.

At each Annual Meeting the Executive Committee shall submit to the Association a detailed report of income and expenditures. At the close of the fiscal year the Executive Committee shall require an official audit of all Association Accounts to be made by an auditor selected by the treasurer and approved by the Executive Committee. The audited report shall be published in the NORTH CENTRAL ASSOCIATION QUARTERLY.

All actions taken by the Executive Committee shall be subject to approval or revision by the Association with the exception of actions taken

relative to those matters over which the Executive Committee has been given final authority.

Section 4. The Commission on Colleges and Universities.

The member colleges and universities of the Association shall be grouped according to geographic districts, the number and boundaries of the districts to be determined by the Commission. Also, the member colleges and universities shall be grouped by type of institution, the basis for the grouping to be determined by the Commission.

The Commission on Colleges and Universities shall consist of representatives of member colleges and universities elected by the Commission subject to the approval of the Association, and three representatives designated by the Commission on Secondary Schools from the membership of the Commission on Secondary Schools. Election of members of the Commission shall be in accordance with a formula adopted by the Commission which shall provide for representation by district and by type of institution. Election shall be for a period of four years, one-fourth of the members to be elected annually. Members shall not be eligible for reelection until one year has elapsed, except in the case of a member of the Board of Review who shall continue on the Commission as an added member until the expiration of his term on the Board.

The officers of the Commission on Colleges and Universities shall be a chairman, a vice chairman, and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations. The length of term for each officer shall be determined by the Commission.

There shall be a Board of Review whose membership shall consist of the chairman of the Commission, *ex officio* chairman of the Board of Review; vice-chairman of the Commission, *ex officio*

vice-chairman; and seven members of the Commission to be elected by the Commission for overlapping terms of five years each. Upon the expiration of this term no member may succeed himself. If a person who is not a member of the Commission is elected to the Board of Review he shall automatically become a member of the Commission upon election to the Board.

The Commission shall prepare a statement of policy to guide member colleges and universities and also colleges and universities seeking approval by the Association, which statement of policy shall be submitted by the Executive Committee to the Association for approval or rejection; shall receive and consider applications and reports from colleges and universities within the territory seeking approval for membership in the Association; shall make such examinations and surveys of these colleges and universities as it deems necessary; shall make examinations or surveys of member colleges and universities as conditions may require; shall request periodic reports from member colleges and universities; shall prepare a list of colleges and universities recommended by the Commission for accrediting by the Association; shall submit this list to the Executive Committee for submission to the Association for final approval; shall submit to the Executive Committee for final approval by the Association the list of individuals elected to membership on the Commission; shall submit its proposed budget to the Executive Committee for approval; and shall make and publish studies of educational problems approved by the Executive Committee; and, most importantly, shall assist colleges and universities in the territory served by the Association in their efforts to strengthen their programs.

The Commission on Colleges and

Universities may, with the approval of the Executive Committee, grant a college or university the necessary freedom to carry on any educational experiment that the Commission has approved.

During the interval between the Annual Meetings of the Association, the Board of Review shall have the authority to carry on the necessary business of the Commission on Colleges and Universities.

Section 5. The Commission on Secondary Schools.

The Commission on Secondary Schools shall consist of the members of the Committee on Secondary Schools for each of the several states comprising the territory of the Association and eighteen other persons elected by the Commission subject to the approval of the Association for a period of three years, one-third of this number to be elected each year.

The State Committee on Secondary Schools shall consist of:

1. A member of the faculty of the state university whose assignment is in the field of secondary education, to be nominated by the president of the university;
2. the director of secondary education of the state department of public instruction or, in case there is no such officer, a member of the staff of the commissioner of education or superintendent of public instruction, designated by him;
3. and, for states having fewer than 300 high schools accredited by the Association, three administrative heads of secondary schools accredited by the Association; and, for states having 300 or more high schools accredited by the Association, five administrative heads of secondary schools accredited by the Association.

In the event that the president of the state university should refuse or fail to designate a member of the faculty to serve on the State Committee of Secondary Schools, and/or in the event that the superintendent of public instruction or commissioner of education should refuse or fail to designate a member of his staff to serve on the State Committee, the Executive Committee of the Association shall fill such vacancies by nominating for election by the Association persons recommended by the Commission on Secondary Schools.

The administrative heads of secondary schools to be included in the membership of a State Committee shall be selected for membership by majority vote of the administrators of the member schools of the North Central Association within the state. Their names shall be transmitted to the Secretary of the Commission on Secondary Schools by the chairman of the state committee. Upon approval of the Commission on Secondary Schools, the names shall be transmitted to the Executive Committee which shall place the names in nomination for election by the Association. The chairman of each State Committee shall be designated by the Commission on Secondary Schools in accordance with its adopted procedures subject to the approval of the Executive Committee. The term of membership of administrative heads of secondary schools on State Committees shall be three years. No such member shall serve more than two consecutive three-year terms.

No member of the Commission on Secondary Schools may serve for more than six years consecutively, excepting (1) the two members of each State Committee who represent the state university and the state department of public instruction respectively and who automatically shall remain members

of the Commission until their retirement from the State Committee, and (2) members of the Administrative Committee of the Commission on Secondary Schools, who automatically shall remain members of the Commission until their retirement from the Administrative Committee.

The officers of the Commission on Secondary Schools shall be a chairman and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations. The length of term of each officer shall be determined by the Commission.

There shall be an Administrative Committee of the Commission on Secondary Schools composed of the chairman of the Commission, ex officio chairman of the administrative Committee; the secretary, ex officio secretary; the preceding chairman; and four members elected by the Commission at the time of the Annual Meeting of the Association for a period of four years, one member to be elected each year.

The Commission shall prepare for the guidance of member schools and secondary schools seeking the approval of the Association a bulletin setting forth policies, regulations, conditions for accrediting, and criteria for the evaluation of secondary schools. Prior to the publication of this bulletin, it shall be submitted by the Executive Committee to the Association for approval or rejection. The Commission shall receive and consider applications and reports from secondary schools within the territory of the Association seeking approval for membership in the Association; shall make such examinations and evaluations of these schools as it deems necessary; shall make such examinations or evaluations of member schools as conditions may require; shall request periodic reports

from member schools; shall prepare a list of secondary schools recommended by the Commission for accrediting by the Association; shall submit this list to the Executive Committee for submission to the Association for final approval; shall submit to the Executive Committee for final approval by the Association the lists of members elected by the Commission; shall submit its proposed budget to the Executive Committee for approval; and shall make and publish studies of educational problems approved by the Executive Committee.

The Commission on Secondary Schools may, with the approval of the Executive Committee, grant a secondary school the necessary freedom to carry on any educational experiment that the Commission has approved.

During the interval between the Annual Meetings of the Association, the Administrative Committee of the Commission on Secondary Schools shall have the authority to carry on the necessary business of the Commission on Secondary Schools. During this interval, the secretary of the Commission shall have the authority to interpret policies, regulations, and criteria. Any appeal from the interpretations and decisions of the secretary of the commission shall be made to the Executive Committee.

Section 6. The Commission on Research and Service.

The Commission on Research and Service shall consist of twenty-four persons; twelve from member colleges and universities and twelve from member secondary schools. There shall be elected by the Commission subject to the approval of the Association for a period of three years, four members of each group to be elected annually. No member of this Commission shall serve for more than two consecutive three-year terms.

The officers of the Commission on Research and Service shall be a chairman, a vice chairman, and a secretary. These officers shall be elected by the Commission in accordance with its own policies and regulations, but subject to the limitations imposed by the constitution. All officers of the Commission shall be selected from among those who are members of the Commission, and it shall be understood that the term of each officer shall not extend beyond the date of the expiration of his term as a member of the Commission.

There shall be a Steering Committee whose membership shall be determined by the Commission in accordance with its own policies and regulations.

The Commission on Research and Service shall initiate, plan, and carry forward studies in the fields of educational and institutional research and service pertaining to universities, colleges, and secondary schools, subject to the approval of the Executive Committee; shall, subject to the approval of the Executive Committee, engage in such research, study, and activity as either of the other commissions may request; shall engage in such research, study, and activity as the Executive Committee may request; shall report its findings to the appropriate commission or commissions and to the Association, as directed by the Executive Committee; shall submit its proposed budget to the Executive Committee for approval; shall submit to the Executive Committee for final approval by the Association the list of individuals elected to membership by the Commission; and shall furnish leadership in interpreting its research findings and in focusing attention on those problems which are in need of consideration.

During the interval between the Annual Meetings of the Association,

the necessary work and business of the Commission on Research and Service shall be administered by a committee consisting of the officers of the Commission.

Section 7. Nominating Committee.

Prior to each Annual Meeting of the Association, the president shall appoint subject to the approval of the Executive Committee, a committee of five persons whose duty it shall be to nominate properly qualified persons for election to the offices of president and vice president, to membership on the Executive Committee, and to any office not elsewhere provided for by the constitution. The announcement of these nominations shall be made during the first session of the Association held during the Annual Meeting, but election shall take place during a later session. Independent nominations may be made upon the written petition of any ten persons who are members of the Association or official representatives of member institutions. The list of persons so nominated shall be filed with the secretary of the Association not later than twelve hours prior to the opening of the session during which the election of officers is to take place.

Section 8. The Editorial Board.

The Editorial Board shall consist of the president, secretary, and treasurer of the Association, the secretaries of the commissions, and a managing editor selected by the Executive Committee.

ARTICLE V. MEETINGS

There shall be an Annual Meeting of the Association at such time and place as may be determined by the Executive Committee and approved by the Association. Meetings of the various commissions shall be held during the week of the Annual Meeting of the Association. Other meetings of the Association and/or other meetings of any commis-

sion may be held when such meetings are authorized by the Executive Committee and approved by the Association.

ARTICLE VI. FEES

An annual fee shall be paid by each member university, college, and secondary school. The amount of the fee shall be fixed by the Executive Committee, subject to the approval of the Association.

Member universities, colleges, and secondary schools are entitled to have the services of the Association and to receive the NORTH CENTRAL ASSOCIATION QUARTERLY and/or such other publications as may be authorized for distribution.

ARTICLE VII. THE RIGHT TO VOTE

Section 1. Only members of a commission shall have the right to vote at official meetings of the commission of which they are members.

Section 2. All votes at official meetings of the Association shall be by member universities, colleges and secondary schools. Each member univer-

sity, college, and secondary school shall have only one vote on any question before the Association, and this vote shall be cast by an officially designated representative.

ARTICLE VIII. QUORUM

Fifty voting members of the Association shall constitute a quorum for conducting business at any official meeting of the Association.

ARTICLE IX. AMENDMENT

This constitution may be amended by a three-fourths vote of the voting members at any official meeting of the Association, providing that a printed notice of any proposed amendments has been sent to each individual who is a member of the Association and to each member university, college, and secondary school at least two weeks prior to the date of said meeting.

ARTICLE X. PROCEDURE

Parliamentary procedure in all meetings of the Association and of the commissions shall be in accordance with *Robert's Rules of Order*.
